Professional Summary

Highly motivated Data Science Intern with a strong foundation in Python, SQL, Machine Learning, and Deep Learning. Proficient in Power BI for data visualization and TensorFlow, Keras for AI model development. Passionate about leveraging analytical skills to solve real-world problems, especially in healthcare analytics. Adept at building predictive models, handling large datasets, and deploying AI-driven solutions.

Technical Skills

- Programming: Python, SQL, Django
- Data Science: Pandas, NumPy, Scikit-Learn
- Machine Learning: Supervised & Unsupervised Learning, Deep Learning (CNN, ANN, LSTM)
- AI & NLP: Generative AI, LangChain, TensorFlow, Keras
- Data Visualization: Power BI, Matplotlib
- Soft Skills: Problem-Solving, Adaptability, Flexibility

Education

Bachelor of Pharmacy - Dr. Babasaheb Ambedkar Technological University
CGPA: 8.41 (2021 - 2024)
HSC (12th): 73.08% | SSC (10th): 83.80%

Experience

Data Science Intern - CodeSpyder Technologies Pvt. Ltd (Aug 2024 - Oct 2024)

- Developed and optimized predictive models using ANN, CNN, and NLP.
- Conducted data preprocessing, exploratory analysis, and hyperparameter tuning.
- Utilized Python, TensorFlow, and SQL to derive insights from large datasets.

Projects

- Medical Chatbot - Generative AI
  - Built a healthcare chatbot using LangChain, PyPDF, and Hugging Face API.
  - Overcame text-to-embedding conversion challenges for accurate medical responses.

- Next Word Prediction - NLP (LSTM Model)
  - Designed an LSTM-based text prediction model using word embeddings & sequence modeling.
  - Implemented data preprocessing, tokenization, and padding.

- Titanic Survival Prediction - Machine Learning
  - Preprocessed dataset, handled missing values, and trained multiple models.
  - Achieved 92% accuracy using a Random Forest Classifier.

- Digit Recognition - CNN
  - Developed a CNN model to classify handwritten digits from Kaggle dataset.
  - Achieved 90% accuracy using multiple convolutional and pooling layers.

Certifications & Achievements

- Python and SQL for Data Science - Great Learning
- Full Stack Data Science Course - CodeSpyder (5 months)
- Kaggle Competition Participant
- Hackerrank 5-Star in Python
