Education

National Institute of Technology, (NIT) Allahabad

Bachelor of Technology in Electronics and Communication Engineering

Nov 2020 – May 2024

Prayagraj, Uttar Pradesh

Skills

Programming: C, C++, Python, SQL

Tools Frameworks: Microsoft Power BI, Tableau, Excel, Pandas, NumPy, Matplotlib, Seaborn

Data Visualization: Skilled in creating reports and dashboards with Power BI and Excel, analyzing data for insights

Soft Skills: Strong analytical and problem-solving skills, effective communication, teamwork, and innovation

Microsoft Office Suite: Skilled in Excel, Word, and PowerPoint for analysis, documentation, and presentations

Projects

Cracking the Youtube Code | *Python, Pandas, NumPy, Matplotlib, Seaborn*

July 2024

- Analyzed YouTube's most liked video, demonstrating a deep understanding of audience engagement metrics.
- Revealed patterns in the most liked video category by investigating the correlation between punctuation usage in titles and views, identifying a 50% higher engagement rate for titles with punctuation.
- Determined the emotional tone of 70,000 comments, providing clear classifications as positive, negative, or neutral, with 65% classified as positive.

Web2Viz | *Power BI Desktop, Power BI Service, BeautifulSoup Python library for Web scraping, Pandas*

Sept 2024

- Utilized Python's BeautifulSoup to web scrape data on the top U.S. private companies, extracting key attributes like revenue, employees, industry, and headquarters.
- Created an interactive Power BI dashboard featuring visualizations such as bar charts, treemaps, and maps to analyze company revenue, employees, and industry classification.
- Incorporated dashboard slicers for industry filtering and presented insights into geographic distribution, enabling users to explore data in-depth and gain insights into the leading private companies.

Unveiling Viewer Behaviour | *Power BI Desktop, Power BI Service*

Nov 2024

- Extracted and analyzed YouTube engagement metrics and video attributes using Power BI to uncover viewer behavior and video performance insights, supporting data-driven decisions.
- Created interactive and dynamic visualizations, including card visuals, line charts, radar charts, and decomposition trees, to showcase key metrics such as views, uploads, and channel performance.
- Delivered recommendations for content optimization by analyzing data on views per subscriber, upload frequency, and engagement factors to enhance content strategies and improve audience engagement.

Certifications

- Certified IBM Data Analyst Professional
- Microsoft Certified: Work Smarter with Microsoft Excel
- Accenture Data Analytics and Visualization Job Simulation
- Microsoft Certified: Power BI Data Visualization

Achievements

- Co-author**, Chapter 9: Prediction of Rhythm-Based Abnormalities in ECGs, in Artificial Intelligence: A Tool for Effective Diagnostics (IOP Science). **Published online:** [Link to publication](#)
- Earned **5 LeetCode badges** for successfully solving in **Python, SQL, and data structures** over 100+ days
- Secured **1st** in footprint event in **culrav 2022** and **2nd** in footprint event in **culrav 2023 (MNNIT Cultural Fest)**
- Achieved **national-level** recognition in handball, demonstrating teamwork, strategic planning, and discipline.
- Ranked among the **top 80 students out of 15,000** candidates in the prestigious **Jawahar Navodaya & Vidyalaya entrance exam**.
