Summary

Data Analyst at Bharat Software Solutions with 2+ year of experience in data analysis, SQL, and Power BI. Skilled in data preprocessing, creating dashboards, and delivering insights to support business decisions and cross-functional collaboration..

Skills

- Python, EDA, Microsoft Power BI, SQL(MYSQL), MS-Excel, Data Visualization, Data Modeling, Power Query
- **Packages / Frameworks:** Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn.
- **Soft Skills :** Critical Thinking, Time Management, Collaboration, Creative.

Education

AISSMS Institute of Information Technology, Pune
B.E in Electronics and Telecommunication

June 2023

- CGPA: 7.74

Professional Experience

Data Analyst | Bharat Software Solutions, Pune.

June 2023

- Performed comprehensive **client data analysis** to enhance customer retention by identifying and enabling targeted engagement strategies.
- Automated data extraction, transformation, and reporting workflows using **Python** and **SQL**, resulting in improved process efficiency and data accuracy.
- Designed and implemented interactive **Power BI dashboards** to monitor key performance indicators and support **data-driven decision making**.
- Collaborated with **cross-functional teams** to gather business requirements, define project scope, and deliver analytics solutions aligned with organizational goals.
- Conducted **market research** to identify trends, generate insights, and support strategic business decisions.

Projects

Product Launch Performance Analysis

- Analyzed and modeled large-scale datasets for a product launch using **SQL Server**, extracting millions of records and applying advanced **DAX expressions** to derive actionable insights.
- Performed segmentation analysis to uncover patterns across key business categories and subcategories, driving product improvement strategies.
- Created interactive reports using **Power BI** to visualize trends and KPIs, effectively communicating findings to stakeholders and senior leadership.
- Optimized **ETL workflows** to integrate structured data from **SQL databases** and **Excel**, ensuring data reliability and consistency.

Medicare Labs Human Health Analysis.

- Read the data in csv files from **pandas libraries**.
- Tested dataset of almost records filled missing values with mean, mode, median.
- Visualize the necessary details in **seaborn Matplotlib**.
