PROFILE

I am a Mechanical Engineering graduate with a deep interest in **Product Lifecycle Management (PLM)** and its role in modern manufacturing. I have hands-on experience with tools like **Fusion 360**, **CATIA**, and **ANSYS**, along with technical skills in **Power BI**, **React**, **Spring Boot**, **MySQL**, and **Java**. My goal is to contribute to digital transformation by integrating engineering knowledge with data-driven and full-stack solutions.

PROFESSIONAL EXPERIENCE

Full Stack Web development Intern | Codeyoung

Jan 2024 – Jan 2025

- Developed responsive web applications using HTML, CSS, ReactJS.
- Worked on full-stack development with MySQL and Spring Boot (Java).
- Gained hands-on experience in API integration and backend logic implementation.

Analyst | Forvia Intern

Jan 2025 – Jun 2025

- Used **Power BI** and **Excel** to analyze product data across development phases.
- Studied product workflows to understand design and lifecycle stages.
- Automated reporting processes to improve efficiency and reduce manual effort.
- Cleaned and transformed data to ensure accuracy and usability for decision-making.

EDUCATION

B Tech Mechanical | MITAOE, Pune CGPA: 8.6

2021 – 2025

XII (HSC) | Dr D Y Patil, Pune 86.50

2021

X (SSC) | Sivaji Vidyalaya Kawathala, Latur 88.40

2019

TRAINING

Full-Stack web development (Industrial Training)

2022 – 2024

- Proficient in building responsive web applications using **HTML**, **CSS**, and **ReactJS**.
- Strong understanding of **Core Java** concepts including **OOPs** and **Exception Handling**.
- Experienced in integrating **RESTful APIs** and managing state using **React Hooks** and **Context API**.

CAD and Simulation Training for Mechanical Engineers

2022 – 2023

- Completed PLM-oriented training program at **MITAOE** focused on CAD and simulation.
- Worked with **Fusion 360** and **CATIA** for 3D product modeling and design workflows.
- Used **ANSYS** for basic structural analysis to support product validation.

PROJECTS

Design of E-Bicycle

- The Online Book Store is a dynamic web application designed to provide users with a seamless book shopping experience. It allows users to browse and search through a wide range of books, add selected items to a shopping cart, and proceed with secure online payments. With features like user login, personalized book recommendations, and an intuitive interface, the platform ensures convenience and reliability for all users.

Tools Used: React JS, CSS, Java, Spring MVC, MySQL, Postman, API

HVAC System Lifecycle Management

- Designed an efficient AC duct system using Fusion 360, focusing on optimized airflow layout and effective space utilization. Conducted flow and structural analysis in ANSYS to assess air velocity, pressure drop, and stress distribution under real-world conditions. Applied basic PLM concepts by creating and managing the Bill of Materials (BOM) and tracking design revisions throughout the development process.

Tools Used: Fusion 360, ANSYS, CATIA, Excel (for BOM tracking)

Global SNC Forecasting Dashboard

- Developed an interactive Power BI dashboard to analyze and forecast Supplier Non-Conformance (SNC) data across global divisions like NAO, China, Japan, Europe, and Thailand. Utilized Excel as the primary data source and applied DAX for dynamic KPIs and trend analysis. Enabled performance tracking, forecasting, and data-driven decision-making through division-wise SNC visualization.

Tools Used: Power BI, Excel, DAX

KEY EXPERTISE

- **Java, MySQL, Excel, Power BI, Fusion 360, CATIA, ANSYS, Problem-Solving, Adaptability, Communication, Leadership, Team Coordination.**
