Software Engineer

SUMMARY

Software Engineer with 1.6 years of hands-on experience in functional, regression, sanity and UI testing of web and mobile application. Creating test cases, defect tracking, and ensuring high-quality software delivery. I collaborate with clients to develop tailored solutions and ensure smooth application functioning.

SKILLS

- Manual Testing
- Sanity & Smoke Testing
- UI/UX Testing
- Test Plan & Test Strategy Preparation
- SDLC and STLC
- Exploratory Testing
- API Integration(SOAP, REST)
- Core Java
- SQL
- Selenium

EXPERIENCE

Software Engineer / Intrida - Pune , India	03/2024 - Current
Intern / Veritech Software IT Services - Pune, India	08/2023 - 03/2024
Intern / Bepay - Ahmedabad, India	05/2023 - 08/2023

EDUCATION QUALIFICATION

Bachelor of Engineering: in Electronics And Telecommunication Pune Vidyarthi Griha's College of Engineering & Technology, Pune	06/2022
--	---------

CERTIFICATIONS

- Fullstack Development-testing
- Manual Testing Fundamentals -
Udemy
- CRM Basic of Sales Cloud, Service Cloud

PROJECTS

Project 1 : Xcheckstudio

- Performed manual testing of the Xcheckstudio web application, focusing on Data Conditioning, Property Management and Data Lexicon modules.
- Designed property test cases for features like Add/Update Properties Property Validation, and Cursor Alignment.
- Validated property types including Text, Number, Data, Choice, Boolean & JSON in the Data Lexicon.

- Implemented automation using workflows, process builders, Approval Process and Flows, enhancing business operations with efficient email alerts, task notifications, and timely follow-ups.
- Created and managed user roles, profiles, and permission sets, ensuring proper access control and security settings, including field-level security and sharing rules.
- Tested UI functionality and cross-browser compatibility for View Mode and Validate Mode.
- Performed regression testing after each release to ensure stability of key features. Tested and debugged applications to ensure optimal performance and functionality.
- Provided ongoing support, troubleshooting, and resolving any user issues or bugs in the system. Assisted in deploying and maintaining applications, ensuring seamless operation.
- Reported and tracked bugs using (CODA, JIRA/BUGZILLA or bug tracking tool) .

Role :

- Troubleshoot and resolved issues raised in CODA and Jira.
- Managed user security and permissions.
- Collaborated with business analysts to review requirement documents and ensure accurate test coverage & update, direction flow in Prep and Validation modes.
- Cross-checked metadata structure in JSON format & tested backend-to-UI data consistency.

Technologies :

- Jira, CODA, Jira, Xcheckstudio, MS Excel(for test cases documentation), JSON(for backend validation) , Manual Testing.

Project 2 : Intern Bepay

- Performed the User Interface(UI) , Functional, Integration, Regression Security and Performance Testing of web application by working on user stories.
- Prepared the Test Strategy and Test Plan documents before every release.
- Defect tracking and filling using Jira and Openforge tools.
- Load testing of the web application with the help of multiple user.
- Attended scrum and project meetings daily to communicate with the project manager, client team, developers and offshore team members.
