Summary

I am an aspiring software testing professional with strong analytical thinking, attention to detail, and a passion for delivering reliable systems. I have a proven ability to collaborate in cross-functional teams, communicate clearly, and solve complex problems under tight deadlines. I am highly adaptable, dependable, and driven by continuous learning and a quality-focused execution

Key Achievements

- Enhanced Efficiency**
Reduced regression testing time by 70% with automation.
- Improved Test Coverage**
Executed automation for over 90% of manual tests.
- Comprehensive API Testing**
Validated 20+ REST endpoints using various HTTP methods.
- Extensive Test Case Execution**
Designed and executed 30+ test cases on 4 applications.

INTERSHIP

Q-Spider	Bangalore
Software Testing Intern	10/2024 - 04/2025
Software Testing Intern	
- Designed and executed 30+ manual test cases across 4 web applications - Reduced regression testing time by 70% through Selenium-based automation - Wrote 50+ SQL queries to validate backend data integrity across multiple databases	

Education

KIIT University	08/2020 - 05/2024
Bachelor of Aerospace Engineering Technology	
Beharagora Polytechnic College	08/2017 - 05/2020
Diploma in Metallurgy Engineering	
TPS DAV Public School, Baharagora	04/2014 - 05/2017
High School (10)	

Languages

Skills

Automated Testing • Git • GitHub • HTML • JSON • Manual Testing • Postman • Pytest • Python • REST • SDLC • Selenium • Soap • SQL • STLC • WebDriver • XML • Gmail

Projects

Automated User Registration Testing

10/2024 - 10/2024

Automated User Registration Testing

- Automated a registration form workflow using Python and Selenium WebDriver
- Validated form logic, including gender selection, password matching, and email format
- Executed automation across multiple browsers and reported cross-browser issues

API Testing with Postman

10/2024 - 05/2025

API Testing with Postman

- Created and executed API tests for various endpoints using Postman
- Validated 20+ REST endpoints using GET, POST, PUT, and DELETE methods
- Tested status codes (200, 400, 401, 404, 500) and used Bearer Token authorization
- Parsed JSON responses and automated regression testing for APIs
