Professional Summary

Results-driven professional with 8+ years in education, now leveraging strong skills in **SQL**, **Python**, and **data visualization** to **drive strategic, data-backed decisions**. Proven ability to **extract insights**, build **dynamic dashboards**, and optimize outcomes through advanced analytics, **EDA**, and **ETL** workflows.

Technical Skills

- **Data Analysis & Manipulation:** Python (Pandas, NumPy), SQL, Excel
- **Data Visualization:** Tableau, Power BI, Matplotlib, Seaborn
- **ETL & Data Handling:** Data cleaning, preprocessing, and ETL automation
- **Statistical Analysis & Data Modeling:** Regression Analysis, Hypothesis Testing, Predictive Analytics

Experience

Mathematics and Computer Science Educator | April 2014 – Dec 2024

With over 8 years of experience in education, I combined instructional excellence with a data-centric approach to student development. My work consistently involved leveraging academic data to personalize learning, evaluate performance trends, and guide strategic interventions—laying the foundation for my current transition into a full-time data analytics role.

Data Analytics & Insight Generation

- Applied a data-driven mindset to classroom strategy, transforming raw student data into actionable insights that improved student success rates by **25%**.
- Communicated key patterns and performance trends to stakeholders, supporting data-informed decision-making across departments.

Dashboarding & Data Visualization

- Developed interactive **Excel dashboards** to monitor and present academic performance trends, contributing to a **15% improvement** in learning outcomes and more informed curriculum planning.

Performance Analysis & Personalization

- Evaluated over **10 years** of academic data to tailor personalized learning interventions, **improving engagement (80%) and retention (90%)**.
- Conducted longitudinal academic performance analysis for **200+ students**, enabling data-informed teaching and accelerating decision-making.

Key Projects

Name: RSVP Movies

Domain: Entertainment Analytics | Tech Stack - SQL

- Analyzed 5M+ movie records over three years using SQL, identifying profitable genres and audience preferences. Provided data-driven insights that optimized content marketing and streamlined production strategies for enhanced profitability.

Name: Recruitment Analytics and Optimization

Domain: HR Analytics (upGrad) | Tech Stack - Python

- Utilized Python to conduct data-driven hiring analysis and developed predictive models, enhancing candidate screening efficiency by 25%. Delivered a recruitment analytics report that boosted quality hires by 12%, driving impactful improvements in the hiring process.

Name: Credit Risk Analyzer

Domain: Bank and Finance | Tech Stack - Python

- Conducted EDA on 50,000+ loan records, uncovering key patterns and trends in loan defaults. Pinpointed the top three risk factors driving defaults, delivering actionable insights that empowered strategic risk mitigation and improved financial decision-making.

Education

Bachelor of science (hons. mathematics) | 2011 – 2014

Sambalpur University, Odisha

Bachelor of education | 2016 – 2018

Choudhary Charan Singh University, Meerut

Certifications

- **Graduate Certificate Program in Data Science** | upGrad
- **Use of Data Analytics Identify the best source of recruitment for a tech startup** | upGrad
