🌐 Bharath Kumar Neela

ABOUT ME

Myself Bharath Kumar Neela, a B-Tech student majoring in Information Technology. I have honed my programming skills in C, Python, and SQL and have hands-on experience in Machine Learning and Web Development. I enjoy taking on challenging projects like DIgiAgro, Oral Cancer Detection, ZenDesk, and Hospital Finder and am dedicated to delivering results that exceed expectations.

EDUCATION

Information Technology (B.E) , <i>Maturi Venkata Subba Rao Engineering College</i> ↗	12/2021 – 05/2025 Hyderabad
Intermediate/+2/ Telangana State Board , <i>Sri Chaitanya Junior Collage</i>	04/2019 – 04/2021 Hyderabad
Telangana State Board , <i>Sri Chaitanya High School</i>	04/2019 Hyderabad

TECHNICAL SKILLS

Programming Languages

Python, C, CSS, HTML

Tools

MySQL, Git/GitHub

INTERESTS

- Pencil Sketching
- Listening Music
- Watching Movies
- Playing Online Games

PROJECTS

DIgiAgro, Block Chain Technology

- Designed and developed an **innovative blockchain-powered platform** to revolutionize the agricultural supply chain.
- Leveraged **Ethereum** and **smart contracts** to ensure **traceability, transparency, and financial inclusion**.
- Eliminated inefficiencies caused by intermediaries by enabling **secure, decentralized transactions** between farmers, consumers, and stakeholders.
- Built a **modular architecture** to support scalability, maintainability, and seamless integration of modern tools.
- Promoted **sustainable farming** practices and fostered trust through end-to-end supply chain visibility.

Oral Cancer Detection, Python, Machine learning

- Developed a **deep learning-based model** using Python to detect oral cancer from medical images at an early stage.
- Utilized **Convolutional Neural Networks (CNNs)** for accurate image classification and feature extraction.
- Aimed to assist healthcare professionals in **early diagnosis** and **improved patient outcomes**.
- Focused on increasing diagnostic accuracy and reducing time through **automated image analysis**.

ZenDesk, Python, AI

- **Designed and developed** an intelligent desktop assistant to enhance user productivity and streamline daily workflows.
- **Implemented voice command recognition** for hands-free interaction with desktop applications.
- **Automated routine tasks** such as opening files, setting reminders, and launching apps to reduce manual effort.
- **Integrated intelligent search**, quick file access, and **task scheduling** features for efficient workflow management.
- **Focused on seamless multitasking and smart assistance** to improve overall user efficiency..

Hospital Finder, Python, Web Application

- Developed a **web-based application** to provide centralized and real-time information on hospitals.
- Displayed key hospital details such as **resource availability**, **bed capacity**, and **physician availability**.
- Aimed to improve accessibility of healthcare services through **user-friendly interface** and **streamlined data presentation**.
- Enhanced decision-making for patients and caretakers by enabling quick access to critical hospital information.
