Jalpaiguri Government Engineering College

Aug. 2021 – June 2025

Bachelor of Technology in Electronics and Communication Engineering; DGPA: 7.92

West Bengal, India

Sarada Vidya Mandir, Raiganj

June. 2019 – March 2021

12th Standard (Science (PCM)) CBSE. Percentage : 87%

West Bengal, India

Saint Xavier's School, Raiganj

April. 2009 – March 2019

10th Standard ICSE. Percentage : 87.8%

West Bengal, India

Experience

Celebal Technologies

June 2024 – July 2024

Summer Intern – ReactJS

Remote

- Built 5+ interactive web applications using ReactJS, HTML5, and CSS3 as part of weekly assignments. Focused on creating responsive layouts, component-based architecture, and dynamic user experiences.
- Developed 25+ reusable components using React Hooks (useState, useEffect) and functional programming. Ensured code modularity and improved maintainability across different sections of the projects.
- Integrated mock APIs using Axios to simulate backend services and display dynamic content in real time. Employed RESTful practices to handle data fetching, state updates, and error handling.
- Used Git and GitHub for version control with 50+ commits, managing code merges and pull requests. Participated in collaborative development and resolved conflicts during team-based workflows.

Skills

Languages: C, C++, Java, Python, JavaScript, C#, MATLAB, SQL, VHDL, HTML, CSS

Developer Tools: Git, GitHub, Visual Studio Code, Salesforce Agentforce, Google Workspace, Windows, .NET

Frameworks Libraries: ReactJS, Numpy, Pandas

CS Fundamentals: Data Structures & Algorithms, Operating Systems, Database and Management System (DBMS), Computer Networks, Object-Oriented Programming (OOPs), Software Development Life Cycle (SDLC)

Soft Skills: Verbal Written Communication, Problem Solving, Teamwork, Time Management, Leadership, Event Management, Technical Writing, Public Speaking

Projects

ConvoPDF: Image-to-PDF Converter | *ReactJS, HTML, CSS, REST API* | [Github Link](#)

- Developed a ReactJS-based web application that converts user-uploaded image files (JPG, PNG) into downloadable PDFs. Focused on creating a seamless UI with responsive design using HTML, CSS, and modular React components.
- Integrated a third-party PDF generation API to handle backend processing efficiently and securely. Enabled real-time file conversion with optimized response time under 2 seconds for standard image sets.
- Designed modular components and an intuitive UI with CSS Flexbox, ensuring consistent performance across devices.
- Implemented key features including file validation, image preview, and error-handling for a smooth user experience. Used React Hooks (useState, useEffect) to manage state changes and asynchronous API calls.
- Ensured cross-browser compatibility and mobile responsiveness using CSS Flexbox and media queries. Published the complete project with clean documentation and source code on GitHub.

Police Tracker: IoT based Smart Tracking System | *ESP8266, RFID Reader, Arduino IDE, Embedded C* | [Github Link](#)

- Designed an IoT-based smart tracking system to monitor the real-time presence of police personnel during crowd-control operations (Bandobast). Leveraged RFID tags and readers to identify personnel and log entry/exit at checkpoints automatically.
- Used ESP8266 Wi-Fi module to transmit scanned data to a central monitoring system for remote access and logging. Enabled secure and wireless data transmission, reducing manual intervention and improving accuracy.
- Integrated indicator LEDs for instant visual feedback on RFID validation (authorized/unauthorized personnel). Enhanced situational awareness and improved on-field visibility for supervising officers.
- Demonstrated successful tracking and data transmission in a simulated Bandobast scenario with multiple personnel. Highlighted potential for real-world deployment in managing large-scale public safety operations.

Achievements

- Achieved a Global Rank of 2628 in Google Kickstart Round D, competing among 15,000+ participants worldwide in a timed coding contest. [Certificate](#)
- Winner of multiple quiz competitions at both inter-college and intra-college levels, demonstrating strong general knowledge and analytical skills.
- Awarded the Amazon Future Engineer Scholarship, selected among 200+ students from over 10,000 applicants across India. [Certificate](#)

Position Of Responsibility

- **General Secretary, Student Union, JGEC**- Led and coordinated student-related activities for 1,000+ students in administrative and cultural matters.
- **Joint Secretary, Renseigner – Quiz Club, JGEC** -Organized inter-college quiz competitions to promote critical thinking and knowledge-sharing.
- **Class Representative, ECE Department**- Acted as liaison between students and faculty, facilitating communication and organizing events.
