Summary

Data Scientist with hands-on experience in **Machine Learning**, **Statistical Modeling**, **ETL pipelines**, and **Data Visualization**. Skilled with **Python**, **SQL**, and cloud-based tools (AWS, Docker, Airflow). Interned at Myntra, delivering multi-million-user analyses, building ML models, and collaborative dashboards—improving engagement and reducing issues. Strong communicator who translates data into actionable insights aligned with stakeholder needs.

Skills

Languages: Python, SQL, Bash

ML & Analytics: Supervised/Unsupervised Learning, Classification, Regression, Time-series Forecasting, SMOTE, SHAP, XGBoost, NLP, RAG

Data Engineering & ETL: Apache Spark, Databricks, PostgreSQL, Kafka (basic), Airflow pipelines

MLOps & Cloud: AWS EC2, Docker, MLflow, Streamlit, GitHub Actions

Visualization & Reporting: Power BI, Tableau, Matplotlib, Seaborn

Processes: Feature Engineering, A/B Testing, Root Cause Analysis, Stakeholder Communication, Dashboard Development

Experience

Data Analyst Intern @ Myntra Designs Private Limited

July 2024 – January 2025

Bengaluru, India

- **Gen-Z Profiling Analysis:**
 - Improved targeted marketing efficiency by 25% and customer engagement by 30%.
 - Identified purchasing drivers by segmenting Gen-Z preferences using advanced analytics.
 - Categorized users based on attributes like brand affinity, affluence level, and session count to drive personalized strategies.
- **Power BI FWD Scorecard:**
 - Developed an interactive Power BI scorecard to track FWD performance.
 - Automated reporting, reducing processing time by 30%.
 - Enabled real-time decision-making for 10+ stakeholders.
- **Top Revenue-Driving Styles Analysis:**
 - Analyzed high-performing styles contributing to over 50% of total revenue.
 - Provided actionable insights to optimize inventory, increasing revenue by 12%.
 - Recommended style prioritization strategies, reducing stock shortages by 15%.
- **Dormant User Analysis for FWD Platform:**
 - Analyzed inactive user behavior to identify causes of inactivity.
 - Developed targeted reactivation campaigns, increasing engagement by 22%.
 - Boosted active users by 15% through personalized outreach strategies.

Education

Post Graduate Diploma in Big Data Analytics

Sep 2023 - Feb 2024

Center for Development of Advanced Computing (CDAC), Pune, India

Bachelor of Engineering in Computer Engineering

Sep 2019 - May 2023

SSBT College of Engineering, Jalgaon, India

Projects

- **Traffic Crash Severity Prediction - Link**
 - Built machine learning models to classify traffic accident severity based on weather, road conditions, and driver behavior, improving prediction reliability. **Key tools: Random Forest, Logistic Regression, Tableau, Matplotlib.**
 - Addressed class imbalance with **SMOTE** and visualized insights for decision-making, supporting traffic safety initiatives.
 - Deployed the solution on **AWS EC2**, showing end-to-end casing deployment and project delivery.
- **IPL Data Analysis - Link:**
 - Processed 500K+ IPL records using Spark SQL, reducing computation time by 40%.
 - Built Tableau dashboards for visualizing KPIs and match insights.
 - **Tools: Apache Spark, Databricks, AWS S3.**
