SKILLS SUMMARY

- **Languages:** Python, SQL, HTML, CSS, OOP
 - **Libraries:** Pandas, Numpy, Matplotlib, Scikit-Learn, TensorFlow, OpenCV
 - **Tools:** Github, Jupyter Notebook, VS Code
 - **Machine Learning & AI:** Predictive Modelling(Regression & Classification), End-to-End Model Development & Lifecycle Management
 - **Data Analysis & Business Intelligence:** Data Cleaning, Wrangling & Manipulation, Statistical Analysis & A/B Testing, Data Visualization & Reporting
 - Maths & Statistics, Feature Engineering, Deep Learning, Gen AI, LLMs, NLP
-

PROFESSIONAL SUMMARY

- Analytical and results-driven Data Analyst with a Bachelor of Engineering in Computer Engineering. Proven ability to translate complex datasets into actionable business intelligence by developing robust **data pipeline, writing advanced SQL queries, and building predictive models**.
 - With 6+ months of experience at both Teams Tech Solutions and Grasp Technologies, I have delivered significant improvements in data accuracy and process automation by **developing and debugging efficient Python scripts**.
 - Key achievements include reducing manual data extraction by 30% and improving analytical project accuracy by 25%. Beyond process optimization, I have proven experience engineering **end-to-end machine learning solutions**, such as a healthcare premium prediction model using frameworks like Scikit-Learn.
 - Adept at leveraging statistical analysis and data science methodologies to uncover critical insights that drives business decision and solve complex data-driven challenges.
 - I am committed to advancing my expertise and am looking to apply my comprehensive experience to master new analytical techniques.
-

WORK EXPERIENCE

Data Analyst | Teams Tech Solutions | Aug 2024 – Jan 2025

- Engineered automated reporting solutions in Excel that consolidated data from multiple sources, reducing manual reporting time by 15% and providing key stakeholders with timely analytical insights.
- Developed robust data pipelines using SQL and Python to process datasets with over 100,000 rows, which increased data accuracy by 20%.
- Leveraged the Pandas library to perform complex data manipulation and aggregation, preparing datasets for in-depth analysis.
- Executed detailed analysis to identify significant trends and patterns, translating raw data into actionable business intelligence.

Data Analyst | Grasp Technologies | Dec 2023 – May 2024

- Engineered automated workflows with Python scripts that reduced manual data extraction and manipulation efforts by 30%.
 - Improved the accuracy of analytical projects by 25% by systematically debugging code and implementing new testing protocols for data integrity.
 - Enhanced the quality and accuracy of analytical projects by systematically debugging code and testing for data integrity. • Contributed to a collaborative environment by creating comprehensive project documentation, making processes transparent and easy for team members to understand.
-

PROJECTS

Healthcare Premium Prediction – Regression: Engineered a predictive regression model in Python that achieved an R-squared value of 0.85 in forecasting health insurance premiums.

-Executed a complete data science workflow, from cleaning and EDA to feature engineering, resulting in a 10% improvement in model accuracy compared to the baseline.

-Implemented and trained machine learning algorithms, leveraging skills in data analysis, scripting, and automation to build a robust working model.

-Demonstrated a strong ability to develop automated data pipelines and apply analytical skills to create and validate a full data-driven solution.

Technologies Used: Python, Pandas, Numpy, Scikit-Learn, Matplotlib

GitHub: <https://github.com/Shreya-web226/Healthcare-Premium-Prediction-Regression>

Credit Risk Model – Classification :

-Developed a machine learning classification model in Python that achieved 92% accuracy in assessing credit risk and categorizing loan applications.

-Managed the full project lifecycle, from initial development and training to the implementation of a Python-based monitoring system to track model performance over time.

-Engineered the solution to be efficient and reliable, making it suitable for deployment in resource-constrained environments.

-Successfully created a model that provides critical data for decision-making, showcasing expertise in building practical, real-world classification systems.

Technologies Used: Python, Pandas, Scikit-Learn, Tensorflow.

GitHub: <https://github.com/Shreya-web226/3.-Credit-Risk-Model---Classification>

Hand Sign Detection System for Deaf and Non-Verbal Communication:

-Engineered a real-time computer vision application using Python and OpenCV to translate sign language gestures into text, creating an accessible communication tool.

-Built and trained a deep learning model with TensorFlow and Keras to accurately recognize and classify a diverse set of hand signs from a live video stream.

-Focused on optimizing the application for low latency and high accuracy, demonstrating strong skills in real-time software development and performance testing.

-Successfully delivered an end-to-end solution that showcases expertise in applying advanced machine learning and computer vision techniques to solve a complex human-computer interaction problem.

Technologies Used: Python, OpenCV

EDUCATION

Dr. D. Y. Patil Institute of Technology

Bachelor of Engineering in Computer Engineering
(CGPA= 8.51)

Pimpri, Maharashtra, India

Aug 2019 - Mar 2023

Mahatma Gandhi Vidyalaya

HSC

Pune, Maharashtra, India

June 2018 - June 2019

Mahatma Gandhi Vidyalaya

SSC from (MSBSHSE) Board

Pune, Maharashtra, India

Mar 2016 - Mar 2017

CERTIFICATION

- SQL (Advanced)
- Artificial Intelligence
- Machine Learning
- Web Development
- Python Programming
