PROFESSIONAL SUMMARY

Analytical MSc graduate in Business Analytics with 4 hands-on internships focused on data science, ML, and automation. Proficient in Python, SQL, Power BI, and statistical modeling, with experience improving model accuracy and automating workflows. Skilled in applying machine learning techniques, regression models, and data visualization to solve real-world problems across BFSI, consulting, and manufacturing domains.

EDUCATION

MSc in Business Analytics (2:1) | Lancaster University, United Kingdom | 2023 - 2024

- **Modules:** Operation Research and Prescriptive Analysis, Data Sourcing Handling and Programming, Forecasting and Predictive Analysis, Analytics In Practice, Intelligent Data Visualization
- **Dissertation:** Enhancing Credit Risk Evaluation

BSc In Data Science (Distinction) | Christ Deemed To Be University, India | 2020 - 2023

- **Modules:** Advanced Python Programming, Inferential Statistics, Introduction to NoSQL, Data Structures, Linear Algebra, Calculus, Microsoft Excel, R programming

WORK EXPERIENCE

Business Consultant Intern | Blackmont Consulting | April 2025 - Present | London, UK (Remote)

- Performed user research through surveys to assess the need for a Spain based leisure app using **Excel**
- Benchmarked competitors and identified gaps in personalization and real-time coordination.
- Proposed go-to-market strategies focusing on low-cost channels like campus marketing and influencer outreach, created research visuals in **Miro**

Data Science and Data Engineering Intern | Intersect IQ | Jan 2023 - May 2023 | Bangalore, India

- Assisted in developing and validating supervised learning models using **Python** and **scikit-learn** for classification tasks, improving accuracy from **68% to 81%**
- Collaborated with cross-functional teams, facilitating seamless integration of technical insights with **Git**
- Labeled **12,000+** data points using **Labelbox** and **pandas** to accelerate model training and reduce manual effort by **35%**.

Data Science Intern | Xoriant Solution Pvt Ltd | July 2022 - August 2022 | Pune, India

- Built a semantic segmentation model using **TensorFlow** and **OpenCV**, improved object detection accuracy by **65%**
- Processed and analysed over **5,000** images using **Numpy** and reduced the processing time by **45%**
- Applied Python and machine learning techniques to optimize model's performance which led to an increase of **75%** in model's efficiency

Data Analyst Intern | Tata Steel Ltd | July 2022 - August 2022 | Jamshedpur, India

- Built classification models using **scikit-learn** and **Python**, increasing predictive accuracy by **13%**
- Systematized the data processing workflows using **advanced Excel formulas** and **VBA** and reduced it by **55%**
- Applied decision science principles, deriving actionable insights and supporting strategic diversions

EXTRACURRICULAR ACTIVITIES

- **Member, Women In Society** - Contributed to organizing **5+** awareness drives and community events
- **Director, Interact Club** - Organised multiple public service workshops and engaged over **1000+** participants across

LANGUAGES, SKILLS AND CERTIFICATES

- **Languages:** English (Professional), Hindi (Native), French (Beginner)
- **Skills:** SQL, Python, Microsoft Excel, Power BI, R Studio, Tableau, VBA, Statistical analysis
- **Certifications:** AWS Academy Cloud Foundation (Amazon Web Services, 2020), Machine Learning Foundations (University of Washington, 2022), Data Analysis & Visualisation in Power BI (Data Science Lab, 2023)
