Agra, UP - 283121, India

OBJECTIVE

Seeking a challenging role in a dynamic organization where I can utilize my professional qualifications and skills to contribute to the company's success, while continuously updating my knowledge with emerging technologies to support both organizational and personal growth.

EXPERIENCE

- **Celebal Technology** May'23 - July'23
Data Analyst Intern Jaipur, India
 - Developed a Library Management System using SQL for efficient data handling.
 - Implemented SQL queries for data creation, manipulation, and retrieval to manage library records.
 - Enhanced data readability and manageability through optimized database design and query structuring.
 - **Exposure** :- Microsoft Excel and SQL.

EDUCATION

- **NIT JAIPUR** Nov'20 - May'24
B.TECH Jaipur, India

PROJECTS

- **Healthcare Appointment Data Analysis** March'25
Tools: Python, Numpy, Pandas, Seaborn, and Matplotlib.
 - Orchestrated an in-depth analysis of 100k medical appointments, unveiling pivotal trends such as the impact of SMS reminders and optimized scheduling on patient attendance.
 - Cleaned and transformed data, Created features like days until appointment and ensuring consistency for analysis.
 - Crafted compelling visual narratives with Matplotlib and Seaborn, delivering strategic insights to revolutionize healthcare scheduling efficiency.
- **Movies dataset Analysis** Nov'24
Tools: Python, Numpy, Pandas, Seaborn, and Matplotlib.
 - Cleaned and preprocessed a 9000+ movie dataset using Pandas and NumPy, addressed missing values, inconsistent data types, and formatting issues.
 - Extracted key insights on top-rated genres, year-wise movie production, and revenue patterns to support data-driven storytelling.
 - Conducted in-depth exploratory data analysis (EDA) with Seaborn and Matplotlib to visualize trends in genres, ratings, popularity, and production year.
 - Utilized Jupyter Notebook for code documentation and interactive analysis, ensured reproducibility and clear presentation of findings.
- **Heart Disease Prediction** July'23 - Aug'23
Tools: Machine Learning, Python, Numpy and Pandas.
 - Implemented data mining techniques like Logistic-Regression, Decision Tree, KNN, Random Forest that classified the diseases as per data.
 - Developed high accuracy model to predict disease occurrence based on user-provided symptoms, displaying probabilistic outcomes and accuracy metrics for various heart conditions using advanced algorithms.
 - Leveraged Python libraries like NumPy, Pandas, Scikit-Learn, and Matplotlib for data analysis and visualization.

SKILLS

- **Programming Languages:** Python and SQL
- **Database Systems:** Microsoft Sql Server and Mysql
- **Specialized Area:** Data Analyst, Business Analyst, Data Visualization, and Product Management
- **Tools & Technologies:** Power BI, Microsoft Excel, Jira, and Machine Learning

CERTIFICATIONS

- **Data Analysis with Python (Coursera) - Joseph Santarcangelo** Apr'25
- **Supervised Machine Learning (Coursera) - Andrew NG** Jan'23
- **Unsupervised Machine Learning(Coursera) - Andrew NG** Feb'23
