Summary

Data Analyst with 1+ year of experience in Sales, Marketing and Edtech analytics, specializing in transforming data into actionable insights. Skilled in SQL, Python, Excel, Power BI, and AWS, with a strong focus on automation, dashboarding, and data modeling. Proven ability to drive operational efficiency contributing to 15% increase in data-driven decision-making and ability to analyze business requirements, implement data-driven solutions, and communicate findings to non-technical stakeholders.

Technical Skills

- **Programming Languages:** Python, SQL(Microsoft SQL Server, MySQL, PostgreSQL)
- **Python Frameworks/Libraries:** Numpy, Pandas, Matplotlib, Seaborn, Scikit-Learn, TensorFlow, Keras, Requests, BeautifulSoup4
- **Tools:** MS Excel, Power BI, Qlik Sense, Looker Studio, Hadoop, MapReduce, Docker, Kubernetes, SQL Server Management Studio
- **SDLC Methodologies:** Agile, Waterfall, Scrum

Work Experience

Sparsh Securitech

Noida, Uttar Pradesh

Data Analyst

Feb 2025 – Present

- Performed Exploratory Data Analysis on comprehensive Sales and Marketing data, handling over a million rows with extensive SQL coding, optimizing logic, and devising an efficient algorithm that lead to 11% revenue growth.
- Collaborated with cross-functional teams, including Product Managers, to develop 20+ key metrics through Power BI dashboards, facilitating goal alignment and supporting quarterly KPI tracking and KRI management.
- Worked with Data Science and Data Engineering teams to enhance ETL job performance, achieving 90% real-time data processing and leveraging PostgreSQL and Hive databases for real-time, efficient reporting, improving on-time efficiency by 17%.
- Led the development of impactful data visualizations using SQL and Excel, proficiently tracking and showcasing key business performance indicators (KPIs), enhancing data presentation effectiveness by 25%.

PW (PhysicsWallah)

Noida, Uttar Pradesh

Business Analyst

Aug 2023 - Oct 2023

- Led end-to-end reporting and dashboarding across offline, online, and hybrid education verticals using SQL, Spreadsheets, and Qlik Sense—powering key business insights and enabling 25%+ revenue growth and 40% improvement in offline center performance.
- Developed 5+ dashboards for business data reporting in order to facilitate data-driven decision-making which led to 5% reduction in operational costs.
- Collaborated with product, sales, and leadership teams, successfully translating complex business requirements into streamlined data analytics strategies, resulting in a 15% improvement in project efficiency.
- Designed and developed compelling data visualizations in SQL and Excel to track KPIs, improving decision support by 25% with clear, impactful presentations that highlighted key performance trends.

The Sparks Foundation

Remote

Business Analyst Intern

Sep 2022 - Nov 2022

- Conducted root cause analysis on marketing attribution discrepancies, improving reporting accuracy by 15%.
- Designed and maintained multiple dashboards using Python and SQL to support BI dashboards and automated reporting.
- Enhanced query speed by 40% through data flow throttling, indexing, partitioning, and query optimization.

Education

Kurukshetra University

Kurukshetra, Haryana

B.Tech CSE with specialization in AI and Data Science

Dec 2021 - Jun 2025

- Cumulative GPA : 7.75/10.0

Projects

Credit Risk Analysis and Default Prediction ([Github Repo](#))

- Led a comprehensive analysis to mitigate credit risk and predict default probability for a portfolio of 30,000 banking customers.
- Utilized SQL queries to extract relevant customer financial data from the banking database, enabling efficient data retrieval and management.
- Utilized Power BI for data visualization, creating insightful dashboards and reports to communicate key findings and model performance metrics to stakeholders.
- Tools and technologies used: **Excel, SQL, Python, Power BI, Banking, Data Analysis.**

Exploratory Data Analysis - Indian Startup Funding Dataset ([Live Link](#))([Github Repo](#))

- Developed a comprehensive web-based data visualization App utilizing Streamlit, Pandas, and Plotly to analyze and interpret the Indian startup funding landscape.
- Designed a dynamic interface allowing users to perform detailed investigations of 3400 startups and investor portfolios, supported by informative tooltips and interactive charts.
- Tools and Technologies Used: **Streamlit, Pandas, Plotly, Matplotlib, Seaborn.**
