

Seeking an opportunity in a reputed organization where I can apply my skills and contribute effectively to its growth while achieving my professional development. Eager to learn, adapt, and grow in a professional environment.

EDUCATION

GV Acharya Institute of Engineering and Technology, Karjat

Bachelor's Degree in Computer Engineering
2020 – 2023 CGPI: **8.59**

Dr. D. Y. Patil Polytechnic, Nerul

Diploma in Computer Technology
2013 – 2019 Percentage: **63.47%**

ST. Jude's High School, Kalyan

SSC
2013 Percentage: **63.40%**

TECHNICAL SKILLS

- Databases: MySQL, SQL Server
- Programming Languages – Python, Java
- Libraries: Pandas, Numpy, Matplotlib, Seaborn
- Data Visualization – Familiar with Tableau for creating basic visualizations and dashboards
- Windows OS, Troubleshooting (Hardware/Software)

SOFT SKILLS

- Detail-oriented and able to handle multiple tasks simultaneously
- Problem Solving, Attention to Detail, Analytical Thinking, Communication
- Adaptable and Flexible also willing to take on more responsibilities
- Passionate about work

CERTIFICATIONS

- Certified Course in Python programming issued by SiiT Education
- Certified Course in Tableau issued by Internshala Trainings
- Certified Course of Diploma in Data Science by NetTech India

PROJECT HIGHLIGHTS

- Project 1: Project on Airline Management System / April 2021.**
 - Technologies used: Java, NetBeans, MySQL
 - Worked with the design team to develop a user-friendly flight booking system, enabling customers to easily book, modify, or cancel reservations.
- Project 2: Project on ATM Management System / October 2022.**
 - Technologies used: Python (3.9 64-bit)
 - Worked with the design team to develop a Python-based ATM simulation system aimed at automating daily banking tasks for efficient input processing and quick output generation.
- Project 3: Project on Student Management System / May 2023.**
 - Technologies used: Python, Thonny, MySQL
 - This system manages student records and resources. It is built to replace manual work with a simple and easy-to-use digital solution that anyone can operate, even without technical knowledge.
- Project 4: Project on Database Design for Employee Management System / July 2024.**
 - Technologies used: SQL Server Management Studio
 - The objective of this project was to design and implement a robust fictional database for managing departmental and employee information, and to execute a series of queries to extract and analyze data from the system. Upon designing the database and inserting the data, various query questions were addressed and performed.
- Project 5: Data Analysis Project using Python / August 2024.**
 - Technologies used: Jupyter Notebook, Python
 - Performed Exploratory Data Analysis (EDA) on Zomato customer data using Python, Pandas, NumPy, Matplotlib, and Seaborn. Cleaned and visualized key trends related to ratings, votes, and cost. Derived insights to help improve marketing strategies and customer targeting.

LANGUAGES

- Marathi – Read, Write, Speak.
- English – Read, Write, Speak.
- Hindi – Read, Write, Speak.
