CAREER OBJECTIVE

Insight-driven Data Analyst skilled in transforming raw data into meaningful insights using SQL, Excel, Power BI, Python, Statistic , Tableau, Committed to delivering data-backed solution that support business decision-making. Eager to join a team where I can grow and contributing to impactful projects.

WORK EXPERIENCE

Recruiter

Nov 2023 - Dec 2024

HRVIEW Consultancy, Nagpur

- Identified sourcing trends and optimized strategies based on data insights
- Managed and maintained accurate candidate records and data
- Developed interest in data analysis through pattern recognition in hiring trends

EDUCATION

Bachelor of Engineering (B.E), Mechanical Engineering

2018 - 2022

Priyadarshini College of Engineering, Nagpur

Percentage: 76.00%

Senior Secondary (XII), State Board Of Maharashtra

2018

Science

Sunny Spring Deal

Percentage: 67.86%

Secondary (X), Maharashtra State Board Of Secondary And Higher Secondary Education

2016

Kuthe Patil Convent

Percentage: 80.00%

TRAININGS / CERTIFICATIONS

Data Science Course

Feb 2025 - Jul 2025

Internshala Trainings, Virtual

- NLP Essentials: Applications To Real-World Problems
- Data Driven- Machine Learning
- Python Data Preparation & Analysis
- SQL For Data Analysis And Insights
- Data Visualization With Power BI
- Data Management And Analysis With MS Excel
- Introduction To Data Analytics

PORTFOLIO

PROJECTS

Shopify Sales Dashboard – Power BI

Jul 2025

- Designed a KPI-driven dashboard using DAX, calculated columns, and Power Query.
- Enabled deep insights via drill through, slicers, and navigation.
- Visualized sales trends, LTV, and payment behaviors for data-driven decisions.

Sales Performance Analysis of Walmart |SQL

Apr 2025 - May 2025

- Utilized advanced MySQL on 3 years of sales data to analyze branch performance and product profitability.
- Identified top branches, segmented spenders, detected anomalies, and ranked payment trends city-wise.
- Delivered insights that supported strategic decisions across sales, marketing, and customer loyalty initiatives.

KPMG data analysis | Excel

Feb 2025 - Mar 2025

- Cleaned and standardized customer, transaction, and demographic data using Excel functions like TRIM (), CLEAN (), and Remove Duplicates.
- Conducted segmentation by wealth, gender, and industry using PivotTables, Filters, VLOOKUP and Conditional Formatting to analyze sales trends and purchase patterns.
- Calculated revenue and Customer Lifetime Conditional Formatting to analyze sales trends and purchase patterns.
- Calculated revenue and Customer Lifetime

SKILLS

Electric Vehicle Data Analysis | Python

Jun 2025

- Analyzed EV dataset using Python, utilizing Pandas functions, along with panda, NumPy, Matplotlib and Seaborn for visualizing price, range, and battery performance
- Built a recommendation system using filtering techniques and performed hypothesis testing with t test_ind and chi2_contingency to compare engine types and performance.
- Applied statistical analysis, correlation matrix using df.corr(), and outlier detection methods like IQR and Z-score to support data-driven decisions in the electric vehicle market.

Airline Performance Analysis | Power BI

Mar 2025 - Apr 2025

- Cleaned and transformed flight, passenger, and ticket data using Power Query for accurate and consistent reporting.
- Modeled data and built relationships; used DAX to create calculated columns, measures, and apply Row-Level Security (RLS) for controlled access.
- Designed an interactive Power BI dashboard enabling real-time, airline-wise analysis through slicers, visuals, and drill-through features.
