in balamurugan-renganathan 🌐 BalamuruganR2004

Summary

A highly driven and detail-oriented Information Technology student with strong proficiency in Python, C++, and SQL. Passionate about emerging technologies, with a keen interest in AI and data science. Demonstrates excellent problem-solving abilities, adaptability, and communication skills through active participation in club activities. Actively engaged in technical training programs and coding challenges to sharpen programming skills. Committed to continuous learning and dedicated to building impactful digital solutions using clean, efficient, and scalable code.

Education

SRM INSTITUTE OF SCIENCE AND TECHNOLOGY <i>B.TECH in Information Technology</i> GPA: 7.37/10.0	<i>June 2022 – May 2026</i>
GOOD WILL MATRIC HR. SEC. SCHOOL <i>Class XII - STATE BOARD OF SCHOOL EXAMINATIONS</i> Percentage - 65.8%	<i>June 2021 – May 2022</i>
GOOD WILL MATRIC HR. SEC. SCHOOL <i>Class X - STATE BOARD OF SCHOOL EXAMINATIONS</i> Percentage - 91.8%	<i>June 2019 – May 2020</i>

Certifications

Python for Data Science NPTEL, <i>IIT Madras</i> , ID: NPTEL25CS05S143906887 https://drive.google.com/file/d/1Ob5q-H63cU6woUYsSYs6QPujNFCzOtxt/view?usp=sharing	Feb 2025
Database Management Systems NPTEL, <i>IIT Kharagpur</i> , ID: NPTEL24CS01S43119401 https://drive.google.com/file/d/10UnegKId3PEUv0Ec8MbLo1YhC8zaaJHm/view?usp=sharing	Mar 2024

Projects

- Heart Stroke Prediction using Data Mining Techniques**
- Developed a prediction model for heart stroke using healthcare data from Kaggle.
 - Applied ML algorithms including KNN, Decision Tree, and Random Forest.
 - Achieved 95% accuracy with the Random Forest model.
 - Focused on features like age, BMI, hypertension, and smoking habits for early detection.
 - Tools Used: Python, Pandas, NumPy, Scikit-learn

Conferences and Workshops

Full Stack Web Development Workshop SRM Institute of Science and Technology, Ramapuram - Participated in a hands-on workshop focused on building full-stack web applications. - Gained practical experience with frontend (HTML, CSS, JavaScript) and backend fundamentals. - Explored client-server architecture and deployed basic web projects during the session. https://drive.google.com/file/d/1HpzwVJyNP6WLTxaGmmVK1B7FXjHvnkqb/view?usp=sharing	Oct 2024

Heart Stroke Prediction using Machine Learning – Conference Presentation

Apr 2025

5th International Conference on Recent Advances in Science, Technology & Engineering (ICRASTE – 2025) – IFERP

- Presented a research paper titled “**Heart Stroke Prediction using Machine Learning**”.
- Showcased the use of KNN, Decision Tree, and Random Forest for medical data prediction..
- Engaged with academic and professional researchers in data science and healthcare analytics.
