Education

KIIT University

Master Of Computer Application

2022 – 2024

Bhubaneswar, Odisha

Technical Skills

Languages and DataBases: Python, JAVA, Power Query, MySQL, Data Visualization.

Visualization Tools: Power BI, GITHUB, VSCode, MS Office Tools, ETL Tools, MS Excel.

Soft Skills: : Communication skills, Analytical & Problem Solving, Customer Centric, Time Management.

Other Skills: Business Analysis, Data Analysis, Customer Acquisition, Team Work.

Experience

Concentrix

Nov 2024 – Apr 2025

Technical Support Engineer

Hyderabad, India

- Provided troubleshooting guidance, and problem resolution to customers via phone, email and chat maintaining strong customer relationships.
- Utilized database management tools to efficiently resolve technical issues related to user access, data retrieval, and system errors.
- Maintained, updated and monitored technical systems, proactively identifying issues and mitigating potential disruptions for customers.
- Contributed to internal documentation, knowledge sharing, and best practices, aiding in team development and customer support efficiency.

Celebal Technologies

May 2023 – Aug 2023

SQL Intern

Remote, India

- As an SQL Intern at Celebal Technologies, I had the incredible opportunity to immerse myself in the world of Data Management, Databases, and Structured Query Language (SQL).
- Developed and optimized complex SQL queries to extract, transform, and analyze large datasets, providing actionable insights for key business decisions.
- Gains hands-on experience in securing databases, applying data access controls, and following best practices for data privacy and integrity.
- Developed and **implemented sophisticated segmentation strategies using SQL & Excel.**

Personal Projects

Hospitality Data Insights Using Power BI – Personal Project

- Designed and implemented an end-to-end data analytics solution using **Power BI** to streamline data collection, transformation, and reporting in the hospitality sector.
- Developed interactive dashboards with key performance indicators (**KPIs**) to track operational metrics, including occupancy rates, revenue per room, and guest satisfaction.
- Utilized Power BI's **DAX** and **Power Query** for data transformation, creating optimized models to provide actionable insights for business decision-making.
- Enabled cross-functional collaboration by sharing interactive reports and dashboards via Power BI Service, enhancing data accessibility and supporting data-driven decision-making across teams.

ECOMMERCE DATA ANALYSIS WITH PYTHON & MYSQL – Personal Project

- Utilized **MySQL Connector** to establish seamless connections between Python & MySQL databases for efficient extraction, manipulation, and management of large eCommerce datasets.
- Leveraged **Pandas** and **Numpy** to clean and preprocess data, handling missing values, duplicates, and outliers, ensuring a high quality dataset for analysis and modeling.
- Created interactive charts with **Matplotlib** and **Seaborn** to visualize sales trends, product performance, and customer segmentation.
- Optimized SQL Queries to analyze large datasets, providing insight on sales, customer behavior, and inventory.

Certifications

- Data Structures and Algorithm with Java - Coding Ninjas.
- I have successfully completed the **Data Engineer** Certification by **Microsoft**, demonstrating my proficiency in building and deploying **AI** solutions.
