SUMMARY

Analytical and process-focused professional with hands-on experience in client operations and issue management within the telecom industry. Proficient in requirement gathering, documentation, and performance reporting using tools like Excel and Power BI. Skilled in identifying recurring service issues, supporting cross-functional teams, and contributing to workflow improvements. Strong understanding of stakeholder communication, SLA compliance, and Agile practices. Now seeking to transition into a Business Analyst role to leverage operational knowledge and analytical thinking in driving business efficiency and decision-making.

EXPERIENCE

eClerx Services Ltd – Analyst

April 2025 – Present | Pune, India

- Acted as a communication bridge between clients and backend technical teams by logging recurring service issues and escalating complex cases for timely resolution.
- Analyzed daily customer interaction trends to identify root causes and contributed recommendations for process improvements.
- Developed weekly performance reports using **Excel** (pivot tables, charts, conditional formatting) to track issue categories and resolution timeframes.
- Participated in regular quality and process improvement meetings to ensure alignment with SLA targets and operational efficiency.
- Maintained accurate documentation of customer complaints, resolutions, and process workflows to support reporting and audit readiness.
- Collaborated with QA and escalation teams to enhance knowledge accuracy and reduce repeat service failures.
- Supported client-facing operations by resolving telecom-related service and technical queries with a focus on first-time resolution.
- Contributed to the preparation of internal documentation and SOPs to streamline issue handling and improve team knowledge sharing.
