PROJECTS

FinScope: AI Powered Earnings and Valuation Analysis

Tech Stack: Mistral , FinBERT , NLP , ATR , Machine-Learning , Data-Science

Description: This project leverages AI and quantitative analysis to extract key financial insights from investor presentations, analyze post-earnings sentiment, identify support & resistance zones, and estimate forward valuations using growth metrics, enhancing data-driven investment decisions.

Automated Pothole Detection and Mapping for Road Maintenance

Tech Stack: Data Science, IoT, HTML, CSS, JavaScript, Python

Description: Engineered a Web app with IoT sensors (MPU6050, NEO 6M GPS) and machine learning (Isolation Forest) for accurate pothole detection, employing HTML/CSS/JS for real-time mapping.

CreditRisc: Credit Risk Prediction of Consumer Loan Defaults using PD

Tech Stack: Python, Machine Learning , Data-Science , Pandas ,Numpy , Logistic Regression

Description: A comprehensive machine learning pipeline to assess credit risk using predictive modeling of loan default probability, loss severity, and exposure estimation based on historical lending data. Built supervised models to predict default probability and loss metrics using real-world lending data.

WealthIQ : An AI-Powered Financial Advisory Chatbot

Tech Stack: Deepseek , Streamlit , Langchain , DataAPIs , pyteserract, AssemblyAI

Description: This app works as a Financial Advisory chatbot providing personal financial planning tools along with real time stock analysis , investment planning , indexes and forex insights and news based analysis for financial markets.
