SUMMARY

Results-oriented Data Scientist with hands-on experience in machine learning, computer vision, and data analytics. Proficient in Python, PyTorch, YOLO, scikit-learn, SQL, and Power BI. Developed and deployed predictive models and deep learning solutions to extract insights and support data-driven decision-making. Practical experience through roles at RajYug Solutions, Afame Technologies, and ETLHive. Passionate about solving real-world problems using AI and data.

EXPERIENCE

RajYug IT Solutions Pvt. Ltd | *Jr. Data Scientist*

Sep 2024 - Present

- Designed interactive Power BI dashboards for finance, retail, real estate, and logistics, improving decision-making by 20% through actionable insights..
- Developed PostgreSQL database schemas, views, and stored procedures, substantially enhancing query performance.
- Designed and deployed object detection models using YOLO, and built predictive models with Scikit-learn and PyTorch, achieving a 15% improvement in accuracy.
- Generated synthetic datasets to improve model training, ensuring scalability across diverse data environments.

Afame Technologies | *Data Science Intern*

April 2024 - May 2024

- Implemented classification models using Python and Scikit-learn, effectively improving prediction accuracy through hyperparameter tuning.
- Performed data preprocessing, feature engineering, and ETL processes, markedly reducing dataset errors.
- Conducted cross-validation and model evaluation (Accuracy, Precision, Recall, F1, ROC-AUC), ensuring robust model performance.
- Analyzed business data to deliver insights, enhancing product offerings and customer satisfaction.

ETLHive | *Data Analyst Intern*

Sep 2023 - March 2024

- Conducted data analysis using SQL, Python, and Power BI, contributing to revenue growth through actionable insights.
- Executed ETL processes and data cleaning, ensuring high data accuracy for reporting.
- Created interactive dashboards to track KPIs, supporting strategic decision-making and identifying growth opportunities.
- Automated reporting workflows, streamlining delivery time using Python scripts.

TECHNICAL SKILLS

Languages: Python, SQL

Machine Learning & AI: Pandas, Numpy, Scikit-learn, PyTorch, TensorFlow, Keras, YOLO

Data Visualization: Power BI, Tableau, Matplotlib, Seaborn, Excel

Database: MySQL, PostgreSQL, SQL Server

Development Tools & Environments: Git, GitHub, Jupyter Notebooks, Visual Studio Code (VS Code), Google Colab

EDUCATION

Bachelor of Engineering - Mechanical

May 2023

Guru Gobind Singh College of Engineering and Research Centre, Nashik, Maharashtra

CGPA: **7.51**
