TECHNICAL SKILLS

Languages: Python, SQL (MySQL Server, PostgreSQL,), Hive SQL, MongoDB

Tools: MS Excel, PowerBI, AWS, Databricks, Snowflake, VS Code, Jira, Google Data Studio, SQL Server

Python Libraries: Numpy, Pandas, PySpark, Matplotlib, Seaborn, Dash

Data Analysis Skills: Data Analysis, Data Mining, Data Visualization, KPIs Development, ETL

PROFESSIONAL EXPERIENCE

Cs - Infocomm

Mumbai, India

Data Analyst

August 2022 - Current

- Analyzed financial transactions data to identify gaps between customers and vendors, focusing on discrepancies in payment processing which led to a 14% reduction in outstanding payments and improved reconciliation processes.
- Prepared and automated detailed financial reports using python and SQL in a Dash application, providing real-time insights into transaction trends and enhancing decision-making for stakeholders.
- Developed ETL pipelines, managed large datasets, and optimized data warehousing processes, improving data retrieval times by 30%.
- Delivered management reports within deadlines, detecting irregular asset movements that contributed to a 10% decrease in financial errors.
- Worked with Data Engineer teams to enhance ETL job performance, achieving 90% real-time data processing and leveraging PostgreSQL and Hive databases for real-time, efficient reporting, improving on-time efficiency by 17%.
- Collaborated with a cross-functional team to understand business requirements and defined data-driven strategies for product improvement.

SIDE PROJECT

Mynta Sales Data Analysis, Link to [Github](#) Codebase

April 2025 - April 2025

- Utilized SQL queries to extract relevant customer sales data from the ecommerce platform, enabling efficient data retrieval and management.
- Evaluated Returns data to identify trends and reduce return rates, resulting in a 15% decrease in product returns and significant cost savings.
- Optimized Ship Expense Management processes, leading to a 12% reduction in shipping costs through data-driven decisions.
- Enhanced Shipment Visibility by developing real-time tracking dashboards, improving delivery accuracy by 10% and customer satisfaction by 8%.
- Led the development of impactful data visualizations using SQL and Excel, proficiently tracking and showcasing key business performance indicators (KPIs), enhancing data presentation effectiveness by 25%.

Zomato Data Analysis, Link to [Github](#) Codebase

June 2022 - July 2022

- Explored data from 50+ eateries to identify unique marketing tactics findings informed tailored strategies resulting in a 20% increase in foot traffic and a 15% boost in revenue.
- Investigated correlations between reviews, food offerings, and dining establishments, providing actionable insights to restaurant owners for improving customer satisfaction.
- Used Python (Pandas, Matplotlib, Seaborn), Excel, and data visualization techniques to produce clear reports.

TEBILLION PRIVATE LIMITED

Aug 2021 - Nov 2021

Python, Intern

Mumbai

- Conducted exploratory data analysis (EDA) on financial data sets using Python (Pandas, Numpy, and Scikit-Learn), leading to actionable insights that enhanced business performance.
- Created an external Hive table, migrating data from HDFS to Hive, which improved data accessibility by 20%.

EDUCATION

Bachelors of Information Technology, GPA: 7.27 / 10

June 2018 - June 2021 Mumbai
