

Smital Ghode

Pune, India | [LinkedIn](#) | (+91) 902-273-1641 | smitalghode218@gmail.com

Graduated with a Bachelor's degree in Artificial Intelligence and Data Science. Working with different technologies to leverage knowledge in the field of Data Science. Has knowledge about databases and different programming languages, and I am actively enhancing my skills in cloud technologies like AWS.

TECHNOLOGIES

- Front End - HTML5, CSS3, Javascript, Bootstrap
- Back End - Java, Python, Networking
- Database - MySQL
- Concepts - REST APIs, OOPs, MVC, Responsive design
- Libraries/tools - Pandas, Numpy, PowerBI, PowerQuery
- Data Science/Machine Learning - Data Analysis, Machine Learning, Data visualization (advanced excel, charts, graphs, dashboards)
- Soft skills - Adaptability, Problem-solving, Teamwork, Detail-oriented

PROJECTS

AI Image Generator Web App

- Built a responsive web application that allows users to generate images based on text prompts using JavaScript and Bootstrap for a clean UI.
- Implemented dynamic DOM manipulation and event handling to simulate AI image generation based on user input.
- Designed a mobile-friendly layout with loading indicators, interactive input fields, and responsive image display using Bootstrap components.

Sales Data Analysis using SQL and Python

- Used SQL to clean, filter, and join datasets to calculate total sales, monthly trends, top-selling products, and region-wise performance.
- Analysed customer purchase patterns and product performance using pandas and matplotlib, and created visual reports to identify key insights such as sales growth, product demand, and high-revenue regions.
- Improved data quality and business understanding through exploratory data analysis (EDA) and feature summarization.

Mechaworks: web 3.0 data labelling platform

- Built a decentralized data labeling platform using React.js and CSS with a responsive UI, connecting clients to a community for image and data annotation tasks.
- The platform enables users to earn rewards through a point-based system by selecting accurate labels from predefined choices.
- Implemented smart contracts for task validation and reward distribution, along with a user-friendly frontend and scalable backend to support real-time task allocation and performance tracking.

EDUCATION

Savitribai Phule Pune University, Pune

Bachelor in Artificial Intelligence and Data Science

May 2025

CGPA: 9.28/10.0

M.M Polytechnic, Pune

Diploma in Computer

July 2022

Percent: 81.43%

CERTIFICATION

Introduction to IoT (Udemy)

Cybersecurity (Cisco)

Databases and SQL for Data Science with Python by IBM (Coursera)
