

A passionate IT professional with 4 years of experience in business analysis, data analytics, process & operations improvement and Cyber Security framework Development. Currently working as a Business Process Analyst at Robinson Solution, with a track record of optimising workflows and driving data-driven decisions. Seeking to build a challenging and growth-oriented career in a dynamic organisation that fosters innovation, continuous learning and professional excellence.

CERTIFICATIONS

- Professional Scrum Master.
- Azure-900 (Cloud) certification.
- Google Cloud Certification.
- Highest Performer Certificate in Information Technology in Business Analysis.

PROFESSIONAL EXPERIENCE

Business Process Analyst

Robinson Solutions (Toyota - TMMC) | Canada | 09/2024 - 04/2025

- Facilitated Scrum ceremonies (Daily Stand-ups, Sprint Planning, Backlog Grooming, Sprint Review, and Retrospective) to ensure team alignment and sprint success.
- Created detailed BRDs, FRDs, User Stories and NFRDs to translate business challenges into actionable software features.
- Worked with cross-functional team - Product Owners (POs), insurance department, security and data to maintain the Product Backlog, define User Stories, resolve conflicts and set Acceptance Criteria.
- Implemented Agile best practices, resolved sprint blockers using 5 Whys and Fishbone analysis, including the DOR and DOD, to ensure high-quality deliverables.
- Utilised JIRA to track sprint progress, update Scrum artifacts, and maintain transparency within the team. Built and optimized SQL queries to extract and transform data from large datasets.
- Led end-to-end business analysis, business processes and User Acceptance Testing (UAT) to validate system functionality and resolve integration issues.
- Designed and optimised process flows using Microsoft Visio, enhancing workflow efficiency and ensuring seamless integration with existing application systems.
- Experienced in cost estimation, cost analysis, analysing direct and indirect costs, conducting risk analysis, and managing training, implementation, and maintenance costs to ensure efficient budget utilization and ROI projections for new process changes, enabling data-driven prioritization by leadership.
- Developed interactive dashboards using Power BI to visualise KPIs, enabling real-time decision-making by leadership.
- Developed wireframes and prototypes using UX best practices to visualise solutions and communicate design intent to developers and QA teams.
- Developed comprehensive insurance documentation covering policy workflows, claims processing, compliance requirements, and end-user training manuals to support audits and system adoption.

Business Analyst

Connestoga College - Capstone Project | Canada | Jan 2025 – Apr 2025

- Led end-to-end business analysis for a cybersecurity enhancement project focused on securing third-party and internal integrations through Zero Trust Architecture (ZTNA).
- Gathered and documented functional, non-functional, and transition requirements, aligning with ISO 27001, PCI-DSS, GDPR, and enterprise compliance standards.
- Designed and validated As-Is and To-Be process flows, enabling migration to Zero Trust Network Architecture (ZTNA).

- Supported security tool selection and feasibility analysis, including Okta SSO/MFA, CyberArk, SailPoint, Zscaler, CrowdStrike, and Microsoft Sentinel for identity, access, and threat management.
- Developed a detailed cost-benefit analysis, forecasting a 5-year ROI model, and direct/indirect cost breakdowns (~CAD \$25M initial investment) and projected ROI of 884% over 3 years.
- Contributed to test planning, including penetration testing, load testing, user acceptance testing (UAT), and regression validation post-deployment.
- Delivered agile documentation, facilitated sprint planning, and maintained continuous alignment with stakeholder needs, and security objectives.

Business Data Analyst

Tech Mahindra | India | 12/2021 - 10/2023

- Collaborated with stakeholders to gather, analyse, and document business requirements, creating detailed Business Requirement Documents (BRD) and Functional Requirement Documents (FRD).
- Applied normalization techniques to clean and structure large datasets.
- Developed and optimized complex SQL queries to support data extraction, transformation, and analysis tasks.
- Designed and developed comprehensive dashboards and visualizations in Power BI to track Key Performance Indicators (KPIs) and support decision-making processes for the client.
- Acted as the primary liaison between Nissan Automotive and the development team, ensuring clarity in communication and alignment of project deliverables with business objectives.
- Created detailed and clear process documentation, including process flowcharts, process narratives, Swimlane diagrams and process diagrams.
- Identified areas of improvement in existing processes, updated documentation, and communicated process improvements to relevant stakeholders.

Technical Associate

Tech Mahindra | India | 10/2020 - 08/2021

- Utilized the SIAM tool to manage and track incidents, prioritizing and addressing issues based on severity and impact.
- Diagnosed and resolved network-related issues using a range of simple to complex SQL queries, improving network reliability and performance.
- Delivered timely and effective support to customers, maintaining high levels of satisfaction and operational uptime.
- Provided technical support for Telstra's telecommunication network, ensuring seamless incident processing and resolution.

EDUCATION

Postgraduate, Information Technology in Business Analysis

89.5%

Conestoga College, Canada (2024-2025).

Bachelor's in computer science

75%

Malla Reddy College of Engineering, India. (2016-2020)

TECHNICAL SKILLS

- **Operating Systems:** Windows, Linux, Unix.
 - **Languages:** C, SQL, Python, Window Functions.
 - **Tools:** Angular, Power BI, Tableau, ETL, SSMS, SSIS, Excel, Visio, Jira, and Confluence.
 - **Web Tools:** HTML, CSS, Bootstrap.
 - Business Analysis.
 - Business Intelligence.
 - Data Analysis.
 - Requirement Gathering & Elicitation.
 - Documenting business requirements (BRD's, SRD's, FRD's & NFRD's).
- Business Process Modelling (BPMN, UML).
 - Stakeholder Management.
 - Use Case & stories Development
 - Project Planning.
 - SWOT Analysis.
 - Lean Process Improvement.
 - Benchmarking.
 - Gap Analysis.
 - Agile & Scrum Methodologies
 - Risk Analysis.
 - Cost Analysis and Estimation.
