- Punbajrao Deshmukh Krishi Vidyapeeth (Agricultural University) Akola, Maharashtra.
 - Shri Shivaji college of Agricultural Biotechnology, Amravati.
-

WORK EXPERIENCE

BDP Energy Pvt. Ltd. Pune (Intern)

May 2024 - Nov 2024

- Business Analyst, Gathering & Analyzing Data to Identify Trends, Elicitation, Nurturing & Forecasting .
 - Developing Actionable Insights & Creating Comprehensive Reports.
 - Actively participated in requirement gathering and analyzing processes.
 - Elicit and document business requirements from stakeholders, analyze market trends, and forecast potential outcomes.
 - Contributed to identifying key project requirements, translating them into actionable insights, and supporting the development team in implementing effective solutions
-

PROJECTS

Sales Forecasting and Market Trend Analysis Using Python & Power BI

- Executed a data-driven project focused on forecasting future sales and identifying key marketing trends to support strategic decision-making.
- Leveraged Python for data analysis and modeling, and Power BI for dynamic visualization and reporting.

Customer Churn Prediction Model

(Logistic Regression ,Tableau)

- Developed a predictive model to identify customer likely to churn enabling proactive retention strategies.
- Used logistic regression for binary classification and tableau for insightful data visualization.
- Built and validated a logistic regression model to predict churn probability, achieving high precision and recall.

Market Campaign Effectiveness Analysis

(A/B Testing , SQL)

- Conducted A/B testing to evaluate the performance of marketing campaigns by segmenting users into control (A) and test (B) groups to assess conversion rate differences.
- Utilized SQL to extract and manipulate data from large relational databases, including user engagement metrics, campaign interactions, and conversion events.
- Interpreted test results to provide actionable business insights, such as campaign ROI, optimal message timing, and target audience effectiveness.
- Presented findings to stakeholders through dashboards and reports, aiding in data-driven decision-making for future campaign strategies.

SKILLS

Languages	Coding Languages, SQL, Power BI, Tableau, R Programming, Python
Tools/Frameworks	Data Analysis & Manipulation, Data Visualization & Reporting,
Databases	Databases & Big Data, Machine Learning & Forecasting
Other Skills	User Research, Project Management, Data Analysis, Excel, Agile Methodology, Requirements Understanding, Waterfall Methodology
