| • CSS | • MongoDB | • Java (JSP/Servlet) | • Docker |
| • JavaScript | • Python | • SpringBoot | |

INTERNSHIP

Java Developer Intern

Paarsh Infotech Pvt Ltd, Nashik

January 2025 – July 2025

- Working as a Java Developer with experience in backend development, full SDLC participation, and feature enhancement using technologies like Spring Boot, JSP, CSS, JavaScript, Bootstrap, Servlet Eclipse, and MySQL.
- Worked on a client project in User Management (authentication and secure login) and HR Management (employee records, attendance, payroll, sales and billing management) modules.

PROJECTS

AI based Resume Analysis and Candidate Selector 🔗

2025

- Developed an AI-powered system for automated resume analysis and ranking aligned with job descriptions. It supports bulk resume uploads, candidate filtering and ranking by skills and experience, providing a more efficient initial screening process.
- Technologies Utilized: Frontend: Streamlit | Backend: Python | Machine Learning: NLP Tool (using sentence-transformers and PyTorch) | PDF Parsing: pdfplumber

Weather Forecasting Website 🔗

2025

- Developed a dynamic website to display real-time weather forecasts using OpenWeather API, providing users with current temperature, humidity, and weather conditions for any searched city.
- Technologies Utilized: Frontend: HTML, CSS, JavaScript | API Integration: OpenWeather API.

Auction Management System 🔗

2023

- Developed a comprehensive online auction system that facilitates the auctioning of diverse products through a dynamic web platform. Enabled users to list and manage products for auction. Implemented a robust registration and bidding mechanism for participants.
- Technologies Utilized: Frontend: HTML, CSS, Bootstrap | Backend: JSP, Servlet | Database: MySQL
- Roles and Responsibilities: Developed front-end and managed MySQL database for the auction management system.
