Summary

Detail-oriented and results-driven data science professional skilled in **Python, SQL, and machine learning**. Proven ability to extract insights from large datasets and develop impactful data solutions. Seeking to contribute to a dynamic team with analytical, engineering, and communication skills.

Education

M.Tech in Computer Engineering (Data Science) COEP Technological University, Pune	2024 – 2026
B.E. in Computer Engineering MVP KBTCOE, Nashik	2020 – 2024 CGPA: 8.71

Technologies

Languages and Libraries: Python, SQL, Numpy, Pandas, Matplotlib, Scikit-learn, TensorFlow

Tools: PowerBI, Excel, PowerPoint, Word

Skills: Machine Learning, Data Analysis, NLP

Projects

Detection of Criminal Activities through CCTV By Analyzing Live Footage 12/2023 – 03/2024
- Built a real-time surveillance tool using CNN and YOLO for detecting mob formations and suspicious behavior in CCTV feeds.

- Processed 1,500+ video frames and improved anomaly detection precision by 28%.

Zomato Data Analysis 04/2025 – 05/2025
- Conducted EDA using Python, Pandas, and Matplotlib on 10,000+ records.
- Delivered data-driven insights that revealed pricing patterns and boosted restaurant engagement suggestions by 20%.

Movie Recommendation System 12/2024 – 01/2025
- Engineered a personalized movie recommender using hybrid filtering on 5,000+ user interactions.
- Improved recommendation accuracy by 35% using collaborative and content-based techniques.

Internships

Data Analytics Intern – Humming Byte, Nashik 07/2024 – 12/2024
- Analyzed business sales data, developed 5+ dashboards with PowerBI improving reporting efficiency by 30%.
- Streamlined Excel automation workflows for monthly data reconciliation tasks.

AI-ML Intern – Sachitech, Nashik 01/2023 – 04/2023
- Designed ML pipelines and classification models on real-time datasets.
- Achieved 84%+ accuracy on test data using Scikit-learn.

Certificates

Python Programming – Coding Seekho By Vikas Singh (Nov 2024, 35 hours)

Certificate of Internship in Data Analytics at hummingbyte technologies pvt.ltd(July 2024-December 2024)

Publication

Detection of Criminal Activities through CCTV By Analyzing Live Footage For Mob Formation, Body Language of Suspect.

International Journal of Innovative Research in Science, Engineering and Technology (IJIRSET)
