EDUCATION AND HONORS

University of Pune, Zeal institute of Management and Computer Application.
Masters in Business Analytics (MBA in BA)

- Cumulative GPA: 7.46/10
- Relevant Coursework: Machine Learning, Data Science Statistics, Big Data Analytics, Gen-AI, Natural language processing, Deep Learning, Data Visulaization

Pune
Aug 2024

University of Pune, Modern College Pune
Honors Bachelor of Arts with High Distinction (Geography Specialist)

- Cumulative GPA: 7.40/10
- Gained expertise in spatial data analysis, geospatial visualization, and mapping techniques using Python for location-based insights.

Pune
May 2021

PROFESSIONAL EXPERIENCE

Cognifyz Technologies Group, Inc.
Data Science & Machine Learning Internship, Division

- Utilized Python, Pandas, NumPy for exploratory data analysis and feature engineering, identifying customer trends.
- Developed predictive models using Scikit-Learn (Regression, Decision Trees, Random Forests) to estimate restaurant ratings, achieving 85% accuracy.
- Created interactive visualizations with Matplotlib, Seaborn, Plotly to analyze restaurant distribution and customer behavior.
- Worked with SQL for data querying and preprocessing, ensuring efficient data management.
- Conducted geospatial analysis to study correlations between restaurant locations and ratings.
- Presented insights through statistical analysis, dashboards, and business intelligence reports for data-driven decision-making.

Nagpur
Sep 2024 - Nov 2024

Maximize Market Research Pvt Ltd.
Junior Data Analyst

- Conducted data analysis using Python, Pandas, and SQL to extract insights from large datasets.
- Performed market research and statistical modelling to identify trends and support data-driven decision-making. Developed interactive dashboards in Power BI and Tableau to visualize key research findings.Utilized machine learning techniques with Scikit-Learn for predictive analytics and trend forecasting.
- Automated data collection and processing using Python, improving research efficiency.Compiled reports and presented insights to stakeholders, enhancing strategic planning

Pune, Maharashtra
Aug 2023 - Oct 2023

Technical Skills

Programming: Python, R, Spark, Scala, SQL, SQLite

Big Data & Databases: Apache Spark, Hadoop, MongoDB, MySQL, SQLite

Machine Learning & AI: Scikit-Learn, Time Series Forecasting, Predictive Modeling, NLP, Deep Learning (TensorFlow, Keras), Statistical Analysis, ChatGPT Integration

Data Science & ETL: Data Cleansing, Wrangling, Visualization, Modeling, Interpretation, API Integration

Cloud & Web Development: Google Cloud Platform (GCP), Flask (Web Application Development)
Data Visualization & BI: Power BI, Tableau, MS Excel
Python & R Libraries: NumPy, Pandas, Matplotlib, Seaborn, dplyr, ggplot2
Development Tools: Jupyter Notebook, Google Colab, PyCharm, Visual Studio Code
Other Tools: MS Office, Excel, Word, PowerPoint, Google AI Studio, Gemini

PROJECTS AND LEADERSHIP

RAG Model with Gemini AI and ChromaDB – GitHub <i>IIT</i> (Indian Institute of Technology, Hyderabad) Technologies: Python, LangChain, ChromaDB, Google Gemini AI, Streamlit Tools & Techniques: NLP, Semantic Search, Vector Databases, Document Chunking, RAG, API Integration Built a Retrieval-Augmented Generation (RAG) system with Google Gemini AI for context-aware responses. Integrated ChromaDB & LangChain for efficient document retrieval and generative AI processing. Developed a Streamlit-based web app for interactive querying and response generation. Optimized document chunking & vector embeddings for enhanced semantic search. Implemented API-driven workflows & safety mechanisms to improve reliability and user experience.	Hyderabad, Telangana Jan 2024 - Feb 2024
Deep Learning Project – Fashion Dataset Classification – GitHub Technologies: Python, TensorFlow, Keras, PyTorch, NumPy, Pandas Tools and Techniques: CNN, Image Classification, Data Augmentation, Model Optimization, Visualization. Built an end-to-end deep learning model using TensorFlow and Keras to classify fashion images. Implemented Convolutional Neural Networks (CNNs) for feature extraction and accurate classification. Applied data augmentation techniques to enhance model generalization and improve performance. Utilized Matplotlib and Pandas for data visualization and exploratory data analysis. Optimized hyperparameters and model architecture to achieve high classification accuracy.	Hyderabad, Telangana Jan 2024 - Feb 2024
AI Travel Advisor with CrewAI & Gemini AI – GitHub Technologies: Python, CrewAI, LangChain, Google Gemini AI, ChromaDB Tools and Techniques: NLP, LLM Agents, Semantic Search, API Integration, Automated Travel Planning. Developed an AI-powered travel advisor using CrewAI and Google Gemini AI to generate customized trip plans. Designed multiple AI agents for real-time budget estimation, itinerary planning, and historical site recommendations. Integrated ChromaDB and LangChain for efficient document retrieval and travel-related semantic search. Implemented API-driven workflows to fetch real-time flight, hotel, and weather data for travel planning. Built a dynamic travel itinerary generator that optimizes budget constraints and user preferences.	Hyderabad, Telangana Jan 2025 - Feb 2025
An Analytical Study of Hotel Booking Cancellation Using Python – GitHub Technologies: Python, Pandas, NumPy, Scikit-Learn, Power BI, SQL Tools and Techniques: Predictive Modelling, Machine Learning Cleaned and structured hotel booking data to enhance analysis accuracy and reliability. Conducted exploratory data analysis (EDA) and developed visualizations to identify key trends and factors affecting cancellations. Built predictive models to reduce cancellations (Revenue, occupancy, bookings, cancellations) using machine learning. Analyzed booking patterns with market basket analysis and time series forecasting. Created interactive dashboards in Power BI for data visualization and reporting. Delivered actionable insights and strategic recommendations, contributing to optimized booking management and reduced cancellation rates.	Pune Aug 2023 – Oct 2023

Extra Curricular and Certifications

- Artificial Intelligence using Python Certification – Infosys. | [Link](#) |
- IIRS Dehradun, ISRO – Indian Space Research Organization in Geoprocessing using Python. | [Link](#) |
- Data Analytics in Google Cloud | [Link](#) |
- Microsoft Learn Student Ambassador- Python and Machine Learning.
- Atos Prayas Foundation – Microsoft Power BI Data Analyst.
- Data Analytics and Visualization – Accenture North America
- **Google Cloud Arcade Participant 2025** — Gained hands-on experience in cloud technologies through GCP labs and challenges. | [Link](#) |
