Professional Summary

Dynamic and results-driven Data Analyst with a proven track record in extracting actionable insights from complex datasets. Proficient in Python, SQL, and data visualization tools. Adept at transforming raw information into strategic business intelligence.

Education

2022/06	B.E in Mechanical Engineering, Priyadarshini Bhagwati College Of Engineering, Nagpur
2018/06	HSC, Ujjwal Jr. Collage
2016/06	SSC, Ujjwal Vidyalaya

Skills Summary

- ✦ **Languages :** Python, SQL, JAVA
- ✦ **Frameworks :** Django, NumPy, Pandas
- ✦ **Tools :** Power BI, Excel, PowerPoint, Tableau, MySQL
- ✦ **Platforms :** Visual Studio Code, IntelliJ Idea preferences.
- ✦ **Soft Skills :** Excellent Communication, Problem-solving, Team player, Versatile

Projects

Weather Prediction

- ✦ Proficient in weather prediction methodologies including :
 - ✦ Data Analysis
 - ✦ Statistical modeling
 - ✦ Interpretation of meteorological trends
- ✦ Utilizes advanced weather prediction software and tools to generate precise forecasts for diverse timeframes and geographical regions
- ✦ Demonstrated track record of providing actionable insights to support decision-making in sectors such as agriculture, aviation, and emergency management
- ✦ Strong communication skills in conveying complex weather information concisely and effectively to stakeholders
- ✦ Continuously stays updated with the latest advancements in meteorological science and technology to enhance forecasting accuracy and reliability

Ad Campaign Performance Analysis for Fashion Elite

Objective: Conducted a comprehensive analysis of fashion sales data to uncover trends and patterns over five years, providing actionable insights into consumer behavior and product performance.

Data Overview: The dataset contained 660 entries with attributes such as price, discount, sales_count, average_rating, and last_stock_date.

Key Responsibilities:

- Data Cleaning: Ensured data integrity by removing non-essential columns (e.g., gender, age_group) and confirming no missing or duplicate values.
- Exploratory Data Analysis: Utilized visualization tools to analyze product categories and sales trends. Notably, identified a peak in total sales during 2020.
- Clustering Analysis: Implemented K-Means clustering to segment products into three distinct groups based on price and discount. This clustering highlighted different pricing strategies and their market segments.

Tools & Technologies: Python, Pandas, Matplotlib, Seaborn, Scikit-learn

Key Achievements:

- Successfully identified sales trends and seasonal patterns, providing insights for inventory management and marketing strategies.
- Demonstrated the ability to handle complex datasets, perform data cleaning, and apply machine learning techniques for clustering.

Certificates

- | | |
|--|---|
| ✦ Python Training from Besant Technologies and | • TCS iON Career Edge – Young Professional Course |
| ✦ Udemy Java Training from Qspiders & Jspiders | • Data Analysis Training |

Awards

- ✦ Certification for participation in Go Kart Car Racing Competition
