Education

Pranveer Singh Institute of Technology

Aug 2022 – Jul 2026

B.Tech in Computer Science (IoT) — CGPA: 8.0 (till 5th sem)

Kanpur, Uttar Pradesh

- System Design
- Operating Systems
- Computer Networks
- DBMS

Work Experience

Turing

Oct 2024 – Jul 2025

Business Analyst

Remote, United States

- Led cross-regional collaboration (NA, EU, APAC) for LLM-based solution delivery aligning research, product, and deployment teams.
- Coordinated ML engineers, data scientists, and stakeholders to productionize AI workflows, increasing system efficiency by 40%.
- Delivered model evaluations and insights for clients (e.g., META) on SFT and RLHF pipelines, enhancing tuning and release readiness.

Outlier.ai (Project-based)

Oct 2024 – Present

AI Software Developer

Remote, United States

- Engineered scalable cloud-native systems using Python, Java, and RESTful APIs, improving ingestion throughput by 20%.
- Automated DevOps pipelines with PyTest, JUnit, and GitHub Actions, reducing rollback incidents by 30%.
- Optimized infrastructure using Docker, Kubernetes, and AWS, enhancing observability and deployment speed by 25%.

Projects

MService WEB-APP | Java, Spring Boot, Docker, Kubernetes, Jenkins, CI/CD

Jun 2024 – Sep 2024

- Architected modular microservices with autoscaling, load balancing, and service discovery, improving backend scalability by 40%.
- Deployed CI/CD pipelines via Jenkins, reducing build-to-deploy time by 50%.
- Used Docker and Kubernetes to orchestrate services, increasing resource efficiency by 30%.

CODE TO DEPLOY | Docker, AWS, Next.js, JavaScript, Nginx

Jan 2024 – Mar 2024

- Created automated deployment platform using Docker and AWS EKS, accelerating release cycles by 35%.
- Integrated reverse proxy (Nginx) and pub-sub logging to improve system observability and reduce log latency by 40%.
- Utilized AWS ECR for container image storage, decreasing fetch latency by 25%.

MULTI-THREADED WEB SERVER | Java, JMeter, Unit Testing

Oct 2023 – Dec 2023

- Developed thread-pooled web server supporting 500+ concurrent connections, boosting request throughput by 30%.
- Achieved 99.9% uptime through robust error handling and failover mechanisms.
- Enabled dynamic thread pool resizing, lowering request latency by 20%.

Technical Skills

Languages: Python, Java, C, C++, JavaScript, Shell, SQL

Web Dev: React, Next, Redux, Node, Spring Boot, Tailwind, Figma

Tools/Tech: Linux, REST APIs, Jenkins, Git, JUnit, Docker, Kubernetes, AWS, MongoDB, SQL, Excel, Power BI

AI/ML: LLM, SFT, RLHF, ML workflows, model evaluation

Certifications: Google Cloud, Salesforce Trailblazer

Leadership / Extracurricular

Startup and Incubation Foundation (PSIT-SIF)

Team Lead

- Led cross-functional teams building AI-driven MVPs with focus on scalability and deployment.
- Worked with founders and CTOs to define product roadmaps using Agile and Market-fit solutions.

Achievements

- Only Day-1 candidate selected by **Trilogy Innovations (CodeNation)** from 1000+ applicants via coding + system design rounds.
- Solved **500+ DSA problems** on LeetCode, GFG, and Codeforces with focus on algorithms and time-optimized logic.
- Made 200+ GitHub contributions to open-source; used Git, CI/CD, and collaborative development practices.
