Address

Solapur, Maharashtra, India

Education

2020 - 2024

B.Tech - Computer Science (Data Science)

Shivaji University, Kolhapur

2018 - 2020

HSC (Higher Secondary School Certificate)

C.B.K College, Akkalkot

Skills

- Languages: Python (pandas, numpy)
- Frameworks : Django, Flask FastAPI.
- Databases : MySQL, SQL SERVER.
- APIs Testing : Postman.
- Skills : JWT Authentication HTTP response.
- Soft Skills: Documentation, Collaboration, Communication

Work Experience

08/2024 - 06/2025

Excel Computers, Kolhapur

Junior Computer Programmer.

- Hands-on experience working with relational databases to write and optimize SQL queries for reporting and data extraction.
- Built and integrated Python (Django, Flask) RESTful APIs for various modules and enabled smooth communication between frontend and backend.
- Worked with MySQL and SQL Server for data modeling, querying, and backend operations.
- Integrated cloud-based services and deployed APIs ensuring security, reliability, and performance.

12/2023 - 07/2024

The Data Tech Labs, Pune

Software Engineer Trainee

- Designed and developed backend architecture and database schema for user and course management, improving system response time by 20%.
- Implemented secure RESTful APIs and access control using Python/Django to protect sensitive user data.
- Added Python and Java questions to the database, enhancing assessment features and ensuring fast data retrieval.
- Integrated OCR for document processing and PII detection, reducing manual work and boosting data security.

Personal Projects

05/2025 - 06/2025

Online Library Management System

- Tech Stack: Python, Django, SQL, HTML, CSS, Bootstrap.
- Features: User & admin login, book search/filter, issue/return, CRUD operations, session handling, API integration, data processing with SQL.

03/2025 - 05/2025

FreshBasket

- Tech Stack: Python, Django, SQL, HTML, CSS, Bootstrap
- Project: Web platform for browsing and ordering fresh vegetables with real-time availability, secure user login, order management, and backend handled using Django and SQL.

02/2024 - 12/2024

Car Rental System

- Tech Stack: HTML, CSS, Bootstrap, JavaScript, Django, Xamp(MySql).
- A web-based platform for seamless car rentals with user, admin & employee panels

Interests

- Learning new programming languages and tools.
- Exploring new technologies and frameworks for development.
- Traveling and sports enthusiast.

Certificates

○ **06/2025 - 06/2025**

Deloitte – Data Analyst Certificate, Technology Job Simulation.

- Completed a virtual simulation where I performed tasks like data cleaning, analysis, & presenting insights, demonstrating core data analytics skills.

○ **07/2022 - 05/2025**

Excel Computers

- Python, SQL (Server), Web Development.

○ **07/2023 - 08/2023**

Softtron Internship Certificate.

- R, ML, AI Technologies.
