

Shreyash Sachin Shedage

📞 7058542055 ✉️ shreyashshedage08@gmail.com

🌐 <https://linkedin.com/in/shreyash-shedage-970b812a7/>

Technical Skills

- **Programming Languages and Databases:** C++, Python, OOP, MongoDB, MySQL
- **Frontend:** JavaScript, HTML, CSS, Bootstrap, EJS Templates, React.js
- **Backend:** Node.js, Express.js, Python, Fast API, (Authentication Libraries)
- **Forecasting & Analytics:** Time Series Analysis, Regression Models, Statistical Modeling, Python (Pandas, NumPy, Matplotlib, Scikit-learn, TensorFlow, PyTorch)
- **Data Science Tools:** Pandas, NumPy, Matplotlib
- **Version Control:** Git & GitHub
- **ETL/ELT:** Experienced in data operations, cleaning, and collection
- **Office Tools:** Microsoft Excel (Advanced proficiency: Pivot tables, VLOOKUP, Data Analysis), Figma tools

Education

Artificial intelligence and Data Science

Jan 2021 – July 2025

Bachelor in Engineering – BE

Pune, Maharashtra

Savitribai Phule Pune University Pune

Experience/Projects

Fotoowl.ai

15 Jan 2024 - 15 Jun 2024

data science and web development

Pune, India

- Developed a dynamic tax invoice generation system using **HTML, CSS, and JavaScript**.
- Created user-friendly documentation with **UI/UX tools**.
- **Data modelling, Data transformation, Data visualization**, DAX, Reports and dashboards.
- Visualizing data with **Excel** and **Power BI** offers a robust method for understanding and presenting insights.
- Conducted **exploratory data analysis (EDA)** and **trend analysis** to drive informed decision-making.
- Gained hands-on experience with **machine learning workflows**, including **data preprocessing, model evaluation**, and **performance tracking** using **Python (NumPy, Pandas, Scikit-learn)**.
- Built predictive insights using supervised learning techniques.
- Familiar with AI tools and practices such as **model training, inference**, and **basic NLP (Natural Language Processing)** for text data.

Personal Projects

Stock Market Prediction using Deep Learning

Technologies: Python, **Algorithms:** LSTM, Linear Regression, Decision Tree, Random Forest, SVM, News API

Designed and implemented a web application to predict stock prices for the next 30 days. The solution leverages a combination of machine learning and deep learning algorithms, including:

- **LSTM** (Long Short-Term Memory): For sequence prediction based on historical data.
- **Linear Regression, Decision Tree, Random Forest, and SVM** (Support Vector Machine): For comparative analysis and enhanced model robustness.

AI-Driven Interview Assistant

Technologies: Artificial Intelligence, NLP, Resume Parsing, React.js, RESTful APIs, Skill Assessment, Interview Simulation

- Developed an **AI-powered platform** to simulate real-time interview scenarios for skill assessment self-evaluation.
- Designed a responsive front-end for smooth user experience using **HTML, CSS, JavaScript, and React**.
- Integrated **resume parsing** functionality to automatically extract candidate details and generate questions.
- Utilized **Natural Language Processing (NLP)** to analyze candidate answers and deliver constructive feedback on content, tone, and clarity.

DevClash Hackathon: Led **Team Aztecs** in a 24-hour AI/ML hackathon, advancing to the finale and Developed solutions leveraging cutting-edge AI/ML algorithms and models, gaining hands-on experience in problem-solving
