SUMMARY

Business Analyst skilled in Python, SQL, Tableau, Excel, and Power BI with a focus on KPI reporting, dashboard automation, and stakeholder collaboration. Experienced in building data-driven solutions, identifying actionable trends, and supporting decision-making across teams. Strong communicator with an analytical mindset, adept at producing clear, timely insights aligned with business goals.

PROJECTS

Sales Performance Analysis — [GitHub](#)

- Conducted sales trend analysis and evaluated performance metrics using Google Sheets and MS Excel.
- Applied advanced Excel functions like Pivot Tables and VLOOKUP to monitor team KPIs.
- Built interactive dashboards to visualize monthly revenue and salesperson efficiency.

Guest Segmentation Dashboard – RFM Analysis — [GitHub](#)

- Created a Tableau dashboard to segment resort guests into VIPs, Loyal, First-Time, and Occasional groups.
- Used heatmaps and trend charts to visualize customer behavior and booking patterns.
- Delivered strategic insights for targeted marketing and guest retention.

Celestial Bloom – Cost-Benefit & Sales Impact Analysis — [GitHub](#)

- Developed a 5-month financial model in Excel to evaluate the profitability of a new IPL-themed product launch.
- Compared old vs new pricing and marketing plans using cost-benefit analysis and contribution margin calculations.
- Built a decision-support dashboard to track incremental revenue, campaign ROI, and break-even projections.

TECHNICAL SKILLS
