WORK EXPERIENCE	
Business Development Associate	
Best Price Flipkart Wholesale	Nov 2018 - Nov 2021
- Onboarded and managed over 100+ retailers and small electronics shops, increasing electronics category sales in the region. - Promoted key SKUs (TVs, mobile accessories, small appliances) by executing product training and demo sessions for retail partners. - Drove B2B sales through Flipkart Wholesale App, educating clients on digital catalog navigation, order placement, and payment. - Achieved and exceeded monthly sales targets, contributing ₹20 lakhs/month in electronics GMV. - Collected customer and market feedback to influence product assortment, pricing, and promotion strategies. - Coordinated with the inventory and logistics team to ensure timely delivery and resolution of customer issues. - Tracked performance using CRM tools and Excel, submitted weekly sales reports to regional managers.	

PROJECTS	
Amazon Sales Dashboard LINK	- Developed a Power BI dashboard to analyze Amazon sales data based on time periods. - Utilized visualizations such as line charts and column charts to showcase sales trends, seasonal patterns, and peak sales periods. - Provided insights on the impact of promotions, holidays, and specific timeframes on sales performance. - Empowered sales personnel to make data-driven decisions regarding inventory management, pricing strategies, and timing of marketing campaigns to capitalize on peak sales periods and maximize revenue. - Technologies used: Power BI
Impact of COVID19 on Students LINK	- Developed a comprehensive dashboard to analyze the impact of COVID-19 on students, considering factors such as online class engagement, weight gain, social media usage, and stress relief activities - Used advanced visualizations to provide insights for better decision making - Highlighted the average time spent on Instagram, YouTube, and WhatsApp by students in the age group under 25, indicating their preferred social media platforms more - The matter of online classes, performance was so poor by the students these insights were provided by the dashboard. - Technologies used: Power BI
Blinkit Analytics Dashboard LINK	- Sales Performance: Low-fat items account for 64.6% of total sales, significantly outperforming regular items. The top-selling categories are Fruits and Vegetables, and Snack Foods, each generating \$0.18M in sales. Stores established in 2018 have generated the highest revenue at \$205K. - Geographical and Store Size Analysis Tier 3 cities are leading in sales performance. Medium-sized stores contribute the highest sales at 42.3% of total sales, followed by small-sized stores at 37%. - To create a comprehensive sales dashboard for Blinkit using Power BI, with the goal of analyzing key metrics and gaining actionable insights to drive business decisions. - Recommendations:

Increase inventory and marketing efforts for low-fat items and top-selling categories like Fruits, Vegetables, and Snacks to leverage their popularity.

- Focus on expanding and supporting stores established in 2018 as they show higher revenue potential.

CERTIFICATES 2024

Programming in Python

- Mastered fundamental Python syntax, proficiently utilizing control flow, loops, functions, and data structures.
- Acquired expertise in procedural programming paradigms and associated logical concepts, enhancing capabilities.

Introduction to Power Bi

- Learned about the data ecosystem, including the ETL process and big data basics.
- Mastered data gathering, identification, and cleaning for analysis preparation.

Foundations: Data

- Developed a comprehensive understanding of the data life cycle and various stages involved in the data analysis.
- Introduced to diverse applications designed to streamline and optimize the data analysis journey, enhancing efficiency and accuracy.
