

Brajesh Pandey

Vrindavan|brajeshp293@gmail.com|7983954985|LinkedIn|GitHub

Education

Sanskriti University, Mathura (Chhata)

Bachelor of Technology in Computer Science and Engineering (AI/ML)

Ramkalidevi Saraswati Vidya Mandir, Vrindavan

High School: 85.8%

Intermediate: 75.4%

Academic Projects

- **RIO-125: Smartphone Movie Ranking System** — Completed during internship at TCS iON. Developed a Python-based application to classify and rank smartphones based on various features. Focused on dataset analysis, feature engineering, and model implementation for ranking logic.
- **Face Recognition Attendance System** — Designed and implemented using Python with OpenCV, Tkinter, and Pandas. Features include real-time face detection, CSV-based attendance logging, password-protected training, and error-handling mechanisms. Emphasis on a clean, professional UI and accurate tracking.
- **Deloitte Australia Data Analytics Job Simulation — Forage (June 2025)** — Completed a virtual job simulation focused on data analysis and forensic technology. Developed a data dashboard using Tableau and utilized Excel to classify data and derive actionable business insights.
- **Pizza Sales Dashboard Project** — Built an interactive Tableau dashboard using a pizza sales dataset to visualize performance metrics like revenue, top-selling pizzas, and peak order times. Focused on data cleaning, KPIs, and business insight derivation.

Achievements & Certifications

- **Certificate:** Data Science Bootcamp – **Udemy (365 Careers)**
- **Certificate:** Data Science Foundations – **Talent Battle**
- **Certificate:** Practitioner Grade A in Design Thinking – **TCS iON**
- **Coursework:** Computer Architecture, Learning Algorithms, Computational Theory
- Internship at **SkillForge**, working on AI projects using Python
- Certificate in **C++ STL** from GeeksforGeeks

Technical Skills

- **Programming & Scripting:** Python (Domain Expertise), C++, SQL, C++ STL, Data Structures
- **Libraries:** NumPy, Pandas, Seaborn, Scikit-learn, TensorFlow
- **Data Science & ML:** Data Analysis, Data Modeling, Feature Engineering, Classification, Clustering, Regression, ANN, Model Evaluation, Time Series Forecasting, Natural Language Processing (NLP)
- **Tools & Platforms:** Jupyter Notebook, Google Colab, MS Excel, Tableau, PowerPoint, Word
- **AI Technologies:** GPT, Gemini, DeepSeek, Grok

Additional Information

- Strong team player with effective collaboration and communication skills
- Proven conflict resolution abilities in team and client settings
- Demonstrated leadership in managing projects and guiding peers
- Consistent performer with a commitment to quality and deadlines
- Smart worker focused on efficiency, innovation, and continuous learning
- **Hobbies:** Technology enthusiast, Anime watcher, Gamer, Traveler
