EDUCATION

Vellore Institute of Technology <i>B.Tech in Computer Science Engineering (CGPA: 7.06/10)</i>	Chennai, Tamil Nadu 2021 – 2025
Christ Jyoti Convent School <i>Intermediate – Mathematics, Physics, Chemistry (MPC) (71.4%)</i>	Prayagraj, Uttar Pradesh 2020 – 2021
Christ Jyoti Convent School <i>High School Certificate (HSC) (79.0%)</i>	Prayagraj, Uttar Pradesh 2018 – 2019

TECHNICAL SKILLS

Languages: Python, SQL
Data Tools & Libraries: Pandas, NumPy, Matplotlib, DAX, Power Query
Visualization Tools: Power BI, Tableau, Excel (Pivot Tables, Charts, VLOOKUP)
Database Technologies: MySQL
Developer Tools: Git, GitHub, Jupyter Notebook, Visual Studio Code, Google Sheets
Data Skills: Data Modeling, Data Cleaning, Data Wrangling, Handling Missing Values, Outlier Detection
Soft Skills: Communication, Team Collaboration

PROJECTS

Banking Analytics Dashboard | *Power BI, DAX, Data Modeling*

- Built a performance-focused Power BI dashboard to uncover patterns in customer profiles, credit approvals, and risk exposure across the banking sector, improving decision-making for over 100,000 customer accounts
- Engineered relational data models and implemented advanced DAX calculations to monitor KPIs like approval rate and delinquency across regions, resulting in a 15% improvement in data accuracy for reporting
- Generated actionable insights that enhanced loan targeting strategies, contributing to a 10% increase in successful loan applications and a potential reduction in default rates by up to 15%

Human Resource Insights | *Tableau, Data Cleaning, Data Visualization*

- Created a Tableau dashboard highlighting HR metrics such as employee attrition, departmental turnover, and workforce diversity, analyzing data for over 2,000 employees
- Standardized and transformed raw HR datasets to ensure accurate reporting across 5+ performance dimensions, improving HR reporting efficiency by 30%
- Provided insights that enabled leadership to reduce attrition in key departments by up to 10%, resulting in a projected 150K savings in hiring costs

Blinkit Sales Analysis | *Excel, Pivot Tables, Data Analysis*

- Performed in-depth sales analysis using Excel to uncover trends in product performance, delivery outcomes, and customer preferences, analyzing over 50,000 sales transactions
- Employed pivot tables, conditional logic, and VLOOKUPS to build insightful and interactive dashboards, reducing analysis time by 40% for the sales team
- Identified top-performing products and flagged fulfillment delays, contributing to an 8% increase in fulfillment efficiency, equating to an additional 200K in revenue annually

Movie Analysis Dashboard | *Power BI, Data Cleaning, DAX*

- Designed a visually engaging Power BI dashboard to analyze cinematic trends, genre-wise performance, and revenue insights, pulling data from over 1,000 movies released across 5 years
- Prepared and modeled raw movie data for multi-dimensional analysis with enhanced accuracy and consistency, reducing data discrepancies by 25%
- Applied custom DAX logic and slicers to analyze ratings, revenue, and popularity over time, resulting in 30% faster decision-making for marketing teams
