EDUCATION

Indian Institute of Information Technology, Allahabad

B.Tech in Information Technology

Rishi Junior College, Mbnr

Intermediate - MPC

Dec 2021 – May 2025

Current GPA: 7.44/10.0

July 2019 – May 2020

Percentage: 95.8%

TECHNICAL SKILLS

- **Languages:** Python, SQL
- **Libraries & Tools:** NumPy, Pandas, Scikit-learn, Seaborn, Matplotlib, PySpark, Excel, Power BI, Tableau
- **ML/AI:** Regression, Classification, Clustering, NLP, Computer Vision
- **Evaluation Metrics:** Confusion Matrix, F1 Score, AUC-ROC, Silhouette Score
- **Databases/Cloud:** MySQL, PostgreSQL, BigQuery (GCP)
- **Coursework:** Machine Learning, Probability & Statistics, Linear Algebra, Artificial Intelligence
- **Soft Skills:** Data Storytelling, Problem Solving, Communication, Collaboration

EXPERIENCE

Lumiq.ai, Remote

Dec 2024 – Mar 2025

Data Analyst Intern

Certificate

- * Delivered customer analytics through EDA using **Pandas** and **Seaborn**, supporting user segmentation initiatives.
- * Developed a **Power BI dashboard** with filters for country distribution, age histograms, and email domains to assist marketing profiling. Analyzed Amazon sales data via **SQL**, revealing seasonal demand trends and category-level revenue insights.
- * Optimized data pipelines using **PySpark**, reducing transformation time by **40%** compared to Pandas-based workflows.

PROJECTS

Zepto Inventory Analysis Case Study – *MySQL, Power BI, Business Insights, KPIs*

- Analyzed a 3.7K+ SKU dataset to identify pricing inefficiencies, discount patterns, and stock-out issues.
- Wrote SQL queries for product segmentation and detected 12% out-of-stock SKUs across categories.
- Built an interactive dashboard highlighting price-performance gaps and potential 8% margin optimization.
- Designed a business case PDF with SQL-driven insights, KPIs, and actionable recommendations. [\[GitHub\]](#)

Uber Trip Analysis Dashboard & Insights – *Power BI, Google BigQuery, SQL, DAX*

- Analyzed 100K+ Uber trip records to extract insights on fare trends, duration, and vehicle distribution.
- Migrated SQL queries to BigQuery, improving query speed and dashboard refresh by 40%.
- Built a 3-page dashboard with geo-segmented KPIs and slicers to support peak-hour pricing strategies.
- Identified 18% higher fare revenue in evening hours; proposed zone-specific driver allocation. [\[GitHub\]](#)

Customer Transactions & Credit Risk Profiling – *Excel, PostgreSQL, Power BI*

- Analyzed 2,000+ transactions to extract KPIs on credit flow, net position, and fraud behavior.
- Segmented customers by age, activity, and risk profile using SQL joins and aggregation techniques.
- Built a 3-page Power BI dashboard with filters and drilldowns; flagged 4% high-risk transactions. [\[GitHub\]](#)

Customer Segmentation with K-Means Clustering – *Python, Scikit-learn, Seaborn*

- Clustered 200+ mall customers based on demographics and spending behavior using K-Means algorithm.
- Achieved a 0.62 Silhouette Score; identified 4 customer segments supporting targeted campaigns.
- Estimated a 15–20% increase in marketing ROI based on cluster-driven personalization. [\[Kaggle\]](#)

ACHIEVEMENTS

- * Solved **400+** problems in DSA and SQL on **LeetCode** and **HackerRank**.
- * Earned the **HackerRank SQL (Basic)** Certification — [View Credential](#).
- * Earned the **HackerRank SQL (Intermediate)** Certification — [View Credential](#).

POSITIONS OF RESPONSIBILITY

- * **Volunteer, Prayaas** — Supported student-led initiatives focused on education and welfare of underprivileged children.
- * **Volunteer, Nirmiti** — Engaged in promoting fine arts and cultural events through active participation in society programs.
