SUMMARY

Data-driven engineering graduate with hands-on experience in **Python, SQL, Excel**, and **Power BI**. Proficient in building analytical solutions to extract insights and optimize business performance. Recognized for delivering impactful dashboards and conducting meaningful research.

SKILLS

Programming & Data Tools: SQL, Python, NumPy, Pandas, Matplotlib, Scikit-learn, Git Version Control

Data Visualization: Power BI (DAX, Power Query, Dashboards), Advanced Excel (Power Query, PivotTables)

Data Analysis: Data Cleaning, Statistical Analysis (Hypothesis Testing, Correlation)

Machine Learning: ML Fundamentals (Regression, Classification, Clustering)

PROJECTS

Earnings Call Decoder Using Agentic AI

- Developed an AI-driven workflow using n8n to automate the classification of earnings call transcript responses as "nonanswer" or "answer," cutting manual analysis time by 80%
- Integrated the Gemini API to classify responses and provide explanations, enhancing transparency and accuracy in financial data analysis
- Wrote custom JavaScript to process and format API responses, delivering clean, structured output for downstream analysis
- Created a scalable solution that processes large datasets and exports results to CSV, enabling actionable insights for investors and analysts

E-Commerce Sales Data Analysis Using Power BI

- Designed an interactive Power BI dashboard to analyze e-commerce sales data, enabling real-time tracking of KPIs like regional sales and product performance
- Implemented dynamic filters, slicers, and DAX formulas to allow users to drill down into granular metrics (e.g., customer demographics, order trends)
- Automated data consolidation from 5+ tables using Power Query, reducing manual data preparation time by 30% and ensuring accuracy

Data-Driven Surface Water Quality Evaluation & Geospatial Mapping Using Excel

- Analyzed 100+ water samples (pH, BOD, TDS, microbial) using Advanced Excel, identifying contamination trends with 95% accuracy and linking pollution sources to industrial discharge
- Built a dynamic Water Quality Index (WQI) with Excel-based regression models and VBA macros, automating data workflows and slashing processing time by 40%
- Designed interactive dashboards (slicers, pivot charts) to visualize contamination hotspots, guiding policymakers to prioritize 5 high-risk zones for mitigation Validated findings by integrating Excel analytics with QGIS geospatial maps, aligning results with real-world pollution patterns for actionable insights

EXPERIENCE

Published Paper: "Application of Nanomaterials in Water Purification"

October 2023

- Published groundbreaking research in Springer, contributing to nanotechnology and environmental science

Technical Head

April 2022 – June 2023

- Led a team of 30 members in Youth for a Cause to execute community outreach projects, impacting over 500 beneficiaries

Campus Ambassador, E-Cell IIT Roorkee

August 2020 – January 2021

- Worked with a team of E-Cell IIT Roorkee, during pandemic for a smooth conduct of E-summit 21 at online platform

EDUCATION AND CERTIFICATIONS

Generative AI for Data Driven Business Decision-Making - IIM Mumbai

B.Tech, Civil Engineering - JSS Academy of Technical Education

Career Essentials in Data Analysis by Microsofts & LinkedIn

Data Literacy Foundations by Maven Analytics

February 2025- Present

Graduated 2025

May 2025
