SUMMARY

Computer Science undergraduate with strong skills in full-stack development (Angular, Java) and AI/ML projects. Proven experience in building scalable systems and APIs. Passionate about solving real-world problems and delivering impactful solutions. Currently seeking a software engineering opportunity to apply and expand my skills in a fast-paced, mission-driven team.

WORK EXPERIENCE

Software Engineer Intern(Belzabar Software Design India Pvt. Ltd.) Sep 2024 - June 2025

Worked as a Full Stack Developer using AngularJS and Java to build reusable UI components and integrated RESTful APIs, reducing page load time by 30%. Designed and implemented RESTful APIs, optimized database queries, and built reusable UI components while collaborating with many teams to optimize user experience, improving task flow completion by 20%.

PROJECTS

Generative AI

Developed a GAN using the CelebA dataset, achieving discriminator loss < 0.15 . Built and trained custom models using TensorFlow and Keras to generate realistic facial images.

Blood Bank System

Designed and deployed a full-stack Blood Bank System using MongoDB, Express.js, React, and Node.js. Enabled real-time blood inventory tracking and donor registration, improving data retrieval speed by 40%.
