

HARSHITH RONDA

Skills

- SQL (SQL Server, MySQL)
- Python (Pandas, NumPy, SciPy, Matplotlib)
- Tableau
- Excel (XLookup, Conditional Formatting, Pivot Tables)
- Microsoft Azure (DataBricks, Azure Data Lake, Azure Data Warehouse)
- AWS
- Microsoft Power BI

Projects

CRYPTOCURRENCY TREND ANALYSIS – Personal Project June 2025

- Integrated CoinMarketCap's REST API using **Python** to fetch real-time data on top 15 cryptocurrencies in USD
- Automated API calls in timed intervals to collect market data such as price, volume, and percent change
- Parsed and normalized nested JSON data into structured **Pandas DataFrames** for analysis and storage
- Used advanced Pandas operations (**groupby**, **stack**, **query**) to compute average performance trends across multiple time frames

DATA PROFESSIONAL SURVEY ANALYSIS DASHBOARD – Personal Project May 2025

- Designed a comprehensive **Power BI** dashboard to visualize key insights from a global data professional survey
- Transformed and modeled survey data using **Power Query and DAX** to ensure analytical accuracy and completeness
- Developed interactive visuals to showcase trends in salaries, tools usage, job satisfaction, and career progression
- Implemented slicers and drill-through functionalities to enable dynamic exploration by region, role, and experience level

AIRBNB LISTINGS ANALYSIS DASHBOARD – Personal Project April 2025

- Built an interactive **Tableau** dashboard to analyze Airbnb listings across major cities, focusing on pricing, availability, and host performance
- Cleaned and prepared raw Airbnb dataset using **Excel and Tableau Prep** for accurate visualization and trend analysis
- Visualized key metrics including average price by neighborhood, property type distribution, and review scores
- Enabled dynamic filtering through parameters and interactive maps for location-based analysis

BIKE SALES ANALYSIS – Personal Project March 2025

- Performed **data cleaning, transformation, and normalization** to ensure data integrity across multiple sheets.
- Created dynamic **pivot tables** to segment customers by income, gender, age, marital status, and bike purchase decision.
- Utilized **advanced Excel** features including **slicers, conditional formatting, and calculated fields** to enhance data interactivity and insights.

Certifications

- **AWS Certified Cloud Practitioner**
- **Data Analytics Bootcamp**

Education

Vellore Institute of Technology (VIT)
B.Tech - Computer Science and Engineering; **CGPA: 8.79**

Vellore, Tamilnadu
Aug 2021 – July 2025

Narayana Junior College
12th Standard - **Percentage: 95.5**

Hyderabad, Telengana
March 2021

Viswabharati Wisewoods School
10th Standard - **CGPA:9.7**

Gudivada, Andhra Pradesh
March 2019
