Objective

Motivated and detail-oriented Java Developer with a strong foundation in Java, Spring Boot, JPA, and MySQL. Passionate about building scalable and efficient applications, with a keen interest in backend development and modern software engineering practices. Eager to contribute to a dynamic development team and grow as a professional in a challenging and collaborative environment.

Education

BACHELOR OF ENGINEERING IN INFORMATION TECHNOLOGY (BE-IT)

Amrutvahini College of Engineering, Sangamner, Dist. Ahmednagar

CGPA: 8.05

Dec 2020 – May 2024

HIGHER SECONDARY CERTIFICATE (HSC)

Agasti College, Akole, Dist. Ahmednagar

Percentage: 63.38%

April 2020

SECONDARY SCHOOL CERTIFICATE (SSC)

Marutirao Kote Abhinav Public School, Akole, Dist. Ahmednagar

Percentage: 88.20%

May 2018

Projects

Bank Management System

A Java-based RESTful API that simulates core banking operations, allowing users to create accounts, perform transactions, and manage financial data securely. Designed for scalability, maintainability, and real-world applicability.

Objective: Developed a secure and efficient RESTful API for managing bank accounts, enabling users to perform transactions, view account details, and manage personal finances.

- Simulated real-world banking operations with features such as account creation, deposit/withdrawal, balance inquiry, and account closure.

- Implemented role-based access control, structured error handling, and transaction logging to enhance security and reliability.

Technologies Used: Java, Spring Boot, MySQL, JPA.

Internship/Training

JAVA INTERNSHIP *Internshala*

May-July 2023

- Completed an intensive 8-week online training program covering core Java concepts and object-oriented programming principles.

- Gained hands-on experience in building modular applications using classes, inheritance, interfaces, exception handling, and collections.

- Developed a capstone project demonstrating application of real-world Java development practices with clean and maintainable code.

- Strengthened backend development skills and problem-solving abilities through structured coding assignments and assessments.

Skills

- Programming Languages: Java, C, C++, Python, HTML, CSS

- Frameworks & Libraries: Spring Boot, Hibernate

- Databases: MySQL

- Tools & Technologies: Git, Github

- Development Practices: Agile Methodology, Test-Driven Development (TDD)

- Soft Skills: Communication, Team Collaboration, Problem Solving, Time Management, Decision Making.
