EDUCATION

Fergusson College

MSc Data Science - **CGPA - 7.80**

2023 – 2025

Pune, MAH

Fergusson College

BSc Computer Science - **CGPA - 8.69**

2020 – 2023

Pune, MAH

EXPERIENCE

Data Analyst at woodfrog.tech [↗](#)

Dec 2024 - March 2025

Role - Data Science Intern

Pune, MAH

- Gained hands-on experience in **Data analytics**, **SQL**, and visualization techniques.
- Analyzed **New York Times** visualizations to derive key insights.
- Conducted an in-depth study of Formula 1 Racing data, exploring speed-time relationships.
- Extracted trends from the **Northwind database** to drive data-driven decision-making.
- Developed an interactive dashboard using **Apache Superset** for reporting and insights.

TECHNICAL SKILLS

Languages: Python, SQL, HTML.

Technologies: Machine Learning, Deep Learning, NLP.

Visualization Tools: Power BI, Tableau, Apache SuperSet.

PROJECTS

Attachment Style Predictor. [↗](#) | Deep Learning, Machine Learning, Streamlit

April 2025

- Designed and implemented predictive models (Random Forest, Deep Neural Network) to analyze the correlation between **parenting styles** (authoritative, authoritarian, permissive, neglectful) and **attachment styles** (secure, anxious, avoidant, disorganized).
- Collected and preprocessed survey data (**84 valid responses**) using psychological questionnaires adapted from validated scales.
- Achieved model accuracy of **71 percent** with balanced precision-recall performance across classes.
- Applied techniques like one-hot encoding, dropout, and stratified sampling; used tools such as Keras, TensorFlow, and scikit-learn.
- Delivered actionable insights for potential use in **psychological profiling**, **relationship counseling**, and **parenting interventions**.

Election Prediction Model 2024 India. [↗](#) | Scikit-learn, Seaborn, Streamlit

Feb 2024 – April 2024

- Developed a comprehensive machine learning model using **Logistic Regression** and **Random Forest** to predict the outcomes of the 2024 national elections
- Achieved an accuracy of **0.94** in predicting election results.
- Conducted extensive **Data Preprocessing** and **Feature Engineering** to enhance model performance.
- Leveraged a combination of Socio-economic indicators, Polling data, and Voter opinions to forecast election outcomes.

Northwind Analysis Dashboard | SQL, Apache Superset, Excel

Jan 2025

- Conducted an in-depth analysis of the **Northwind database**, focusing on sales, orders, and customer behavior.
- Built an **interactive dashboard using Apache Superset** to visualize key business metrics.
- Developed **SQL queries** to extract insights on revenue trends, supplier efficiency, and top-performing products.
- Provided Seasonal Analysis for Trends and Revenue.

Churn Analysis Bank Customer Data. [↗](#) | PowerBI, MS Excel

Aug 2024

- Developed an **interactive dashboard** to visualize trends, customer segments, and predictive insights.
- Data Preparation: Clean and transformed the Raw Data using **MS Excel**.
- Data Modeling: Created Queries to organise the data for Analysis and Reporting.
- Data Analysis: Created Measures using **DAX**.
