EDUCATION

ACHARYA INSTITUTE OF TECHNOLOGY, Bengaluru <i>B.E - Electrical and Electronics Engineering - CGPA - 7</i>	2020 – 2023 <i>Bengaluru, Karnataka</i>
GOVERNMENT POLYTECHNIC, Gulbarga <i>Electrical and Electronics Engineering - Percentage - 73</i>	2017 – 2020 <i>Gulbarga, Karnataka</i>
GOVERNMENT HIGH SCHOOL, Sarasamba <i>SSLC - Percentage - 89.12</i>	2016 – 2017 <i>Gulbarga, Karnataka</i>

TECHNICAL SKILLS

- | | | | |
|----------------------|-----------------------------|-------------------|-----------------------|
| • Python | • Data Visualization | • Wire framing | • ERP, CRM System |
| • Machine Learning | • Statistical Data Analysis | • Numpy, Pandas | • Documentation |
| • SQL | • Jira | • Basic ETL Tools | • Product Development |
| • Microsoft Power BI | | • MS Office | • Software Design |

SOFT SKILLS

- | | | | |
|-------------------|-----------------------|-------------------------|--------------------------|
| • Communication | • Conflict Management | • Negotiation | • Business Sense |
| • Time Management | • Adaptability | • Requirement Gathering | • Programming |
| • Creativity | • Critical Thinking | • Story Telling | • Stakeholder Management |
| • Teamwork | • Presentation Skills | • Presentation Skills | |
| • Leadership | • Problem-Solving | | |

PROJECTS

Energy Analytics | Inventive Software Solution pvt ltd **2024**

- Working on the end-to-end development of a comprehensive billing software solution for utility services, including water and electricity, under the Energy Analytics department. Responsibilities included gathering and analyzing business requirements, defining functional and non-functional specifications, and preparing process flows for key modules such as metering integration, subsidy management, departmental billing, and smart billing workflows. Actively collaborated with development, QA, and stakeholder teams to ensure alignment with compliance standards and client expectations. Led UAT coordination, tracked system defects, and supported deployment planning. Contributed to multiple project phases across various utility boards, enhancing system efficiency, billing accuracy, and consumer satisfaction through automation and process improvements.

Data Science Project | Rubixe AI **2023-2024**

- Developed machine learning models to predict IT ticket priorities (P1/P2) and forecast incident volumes over a 36-month period using historical ITSM data. Performed data cleaning, preprocessing, and feature engineering to enhance model accuracy. Applied ARIMA and Prophet for time series forecasting and Random Forest/XGBoost for classification. Evaluated models using cross-validation, confusion matrix, and AUC-ROC metrics. Automated pipelines in Python and visualized insights using Power BI, enabling better SLA adherence. Achieved 85 percentage forecast accuracy and reduced high-priority ticket response time by 20 percentage.

EXPERIENCE

Inventive Software Solutions PVT LTD **11/2024 - Present** *Business Analyst* *Noida, India*

- Working as a Business Analyst in the Energy Analytics department, contributing to the development of utility billing software for water and electricity services.
Conducted detailed requirement gathering sessions with stakeholders to understand functional needs and translated them into clear technical specifications.
Designed and documented workflows for modules such as metering integration, smart billing, departmental billing, and subsidy management.
Collaborated with development and QA teams to ensure accurate implementation of business requirements and adherence to regulatory standards.
Led UAT coordination, including test case creation, defect tracking, and user feedback incorporation for multiple utility board deployments.
Actively involved in process optimization, helping automate manual billing processes and reduce operational inefficiencies.
Played a key role in multiple cross-functional projects, improving billing accuracy, system usability, and consumer experience.

Rubixe AI

06/2023 - 01/2024

DATA SCIENCE CONSULTANT intern

Bengaluru, India

- Completed an 8-month internship at Rubixe as a Data Science Consultant, where I was actively involved in multiple real-world projects across various domains. Gained hands-on experience in data collection, preprocessing, exploratory data analysis, and building machine learning models for classification, regression, and clustering tasks. Collaborated with cross-functional teams to develop data-driven solutions, create actionable insights, and deliver project reports. Contributed to model evaluation, feature engineering, and deployment support, strengthening my practical understanding of end-to-end data science workflows.
