Summary

Results-driven Data and Business Analyst with 1.5 years of experience transforming raw data into actionable business insights. Proficient in SQL, Python, Excel, and Power BI, with a strong foundation in ETL pipelines, dashboard development, and stakeholder reporting. Adept at churn and return analysis, customer segmentation, and performance monitoring across sales, finance, and marketing functions. Proven ability to support data-driven decision-making in fast-paced, high-growth environments.

Core Skills

- **Languages/Tools:** SQL, Python (Pandas, NumPy, Matplotlib, Seaborn), Excel (Advanced), Power BI, Tableau, Power Query
- **Databases:** SQL Server, MySQL, MongoDB
- **Analytics:** Churn Analysis, Return Rate Analysis, Customer Segmentation, KPI Tracking, Business Insights
- **Development:** ETL Pipelines, Report Automation, Dashboard Design, API Integration
- **Processes:** SDLC, Agile, UAT Support, Stakeholder Coordination, Documentation
- **Soft Skills:** Communication, Critical Thinking, Collaboration, Problem Solving

Professional Experience

Data Analyst & BI Developer

Ray Computech Pvt. Ltd., Kolkata

March 2024 – Present

- Built and maintained 10+ Power BI dashboards tracking KPIs for sales, returns, customer behavior, and finance.
- Automated SQL and Excel-based reporting pipelines, improving efficiency by 40%.
- Developed ETL workflows using SQL and Python to consolidate data from multiple sources.
- Analyzed 15K+ weekly transactions to monitor churn patterns, detect anomalies, and support operations.
- Collaborated with cross-functional teams to deliver data-driven reports and support decision-making.

Key Projects

ETL Pipeline and Insight Automation

Built an automated ETL framework using SQL and Python to clean and consolidate weekly e-commerce data. Enabled faster access to insights for strategic and operational reporting.

Customer Segmentation and Return Analysis

Created dynamic Power BI dashboards to visualize segmented customer return trends. Used SQL logic and DAX to identify high-return segments, supporting supply chain and customer service decisions.

Hospitality Churn and Booking Abandonment Analysis

Led market and competitor analysis for a hotel chain facing a 20% market share drop. Identified churn reasons and helped boost online bookings by 30% and reduce booking abandonment by 20%.

Certifications

- SQL for Data Science – Great Learning

Education

B.Tech in Information Technology

2019 – 2023

Calcutta Institute of Engineering and Management – Kolkata, West Bengal
