Seeking assignments as Data Analyst/ Business Analyst with in-depth skills in Python, SQL, Power BI, and data visualization

EXECUTIVE SUMMARY

- Dynamic and results-driven **Data Analyst** with hands-on experience in database development, data analysis, business intelligence, and reporting
- Proficiency in Python, SQL, and MySQL, with expertise in developing scalable database structures, creating interactive dashboards using Power BI, and automating data workflows using Excel VBA.
- Deft in optimizing relational databases, improving SQL queries, and developing interactive Power BI dashboards to deliver actionable insights
- Skilled in extracting actionable insights to support strategic decision-making and business growth
- Familiar with Agile and Waterfall project management methodologies. Experienced in gathering requirements, documenting user stories, and collaborating with cross-functional teams to deliver strategic insights.
- Experienced in preparing Business Requirement Documents (BRD) and Functional Requirement Documents (FRD) to capture and translate business needs into actionable technical requirements

CORE COMPETENCIES

- | | |
|--|--|
| - Data Analysis & Visualization | - SQL & Database Management |
| - Power BI Dashboard Development | - Excel Automation (VBA, VLOOKUP, HLOOKUP, and Pivot Tables) |
| - Data Cleaning & Pre-processing | - Business Intelligence & Visualization |
| - Business Requirement Gathering | - Agile & Scrum Practices |
| - Business Requirement Documentation (BRD&FRD) | - Wireframing (Balsamiq) |

TECHNICAL SKILLS

- | | |
|----------------------------------|---|
| Languages & Database: | Python (Pandas, NumPy, Matplotlib, Scikit-learn), MySQL |
| Visualization Tools: | Power BI (Dashboards, DAX, Data Modelling), Excel (Charts, PivotTables) |
| Other Skills: | SDLC, Agile Methodology, Business Analysis, Requirement Gathering and Documentation, Data Analysis, Exploratory Data Analysis, Data Cleaning & Pre-processing, Data Visualization, Reporting & Dashboards |
| Advanced Skills: | Microsoft Azure, Machine Learning, Artificial Intelligence (AI) |

PROFESSIONAL EXPERIENCE

NMD InfoTech., Pune as Business Data Analyst Intern
Jul 2024 – May 2025

Key Result Areas:

Database Development & Optimization:

- Designing scalable database structures to support growing data volumes and improve efficiency
- Developing, and optimizing complex SQL queries for ETL processes, reducing execution time by 30%
- Improving system uptime and performance through efficient query tuning and indexing
- Managing, and optimizing relational databases, ensuring high performance, availability, and security

Data Analysis & Reporting:

- Enhancing quality, and reporting accuracy by cleaning, and processing data
- Generating actionable insights by using Python for data analysis and predictive modelling
- Reduced manual effort by 40% by automating MIS reports using Excel VBA and Power BI

Business Intelligence & Visualization:

- Creating interactive Power BI dashboards to visualize key metrics and improve decision-making
- Enhancing trend identification by 40%, and decision accuracy by 30% through real-time insights
- Streamlining reporting and data presentation for better stakeholder engagement

- Created detailed Business Requirement Documents (BRD) and Functional Requirement Documents (FRD) to define project scope and system functionality
- Participated in Agile ceremonies like Sprint Planning and Daily Stand-ups to track requirement progress and ensure project alignment

Stakeholder Collaboration:

- Collaborating with cross-functional teams to gather requirements and align solutions with business goals
- Delivering actionable insights through intuitive dashboards, enhancing strategic decisions

Highlights:

- Cut report generation time by 50% through SQL and Power BI optimization
- Built a Banking Dashboard to identify trends for targeted marketing
- Enhanced search accuracy in a Hybrid Search Engine with semantic logic
- Reduced query time by 30% with SQL and stored procedure tuning

PROJECTS UNDERTAKEN

Project: Building Hybrid Search Engine

Details: Combining Keyword and semantic Search

- Developed search engine with integrated keyword and semantic search, thereby improved search accuracy by eliminating the need for exact keyword matches
- Utilized Sentence Transformer (**all-MiniLM-L6-v2**) for keyword embeddings, enabling precise database matching and result retrieval

Project: Banking Analysis Dashboard

Details: Power BI, SQL, Data Cleaning, Data Analysis

- Cleaned data using SQL to resolve null values, duplicates, and inconsistencies
- Imported cleaned data into Power BI for visualization and reporting
- Created dynamic visualizations (bar charts, maps, KPIs) to highlight key metrics
- Enhanced user experience with interactive dashboards providing actionable insights

Project: Data Insights with Power BI

Technologies: Power BI, Data Modelling and Cleaning

- Developed an interactive Power BI dashboard for Adventure Works, reduced data trend identification time by 40% and improved decision accuracy by 30%
- Streamlined strategic decision-making through dynamic visualizations and actionable insights

ACADEMIC CREDENTIALS

2025 B.Tech (Computer Engineering) from DY Patil School of Engineering & Technology Ambi, Pune
2022 Diploma in Information Technology from Government Polytechnic, Nanded, Maharashtra

CERTIFICATIONS

- Accenture - Data Analytics and Visualization Job Simulation
- Tata - Data Visualisation: Empowering Business with Effective Insights
- Tech Mahindra – Power BI Visualization
- Tech Mahindra – SQL Fundamentals
