Passionate about analytics and committed to a healthy lifestyle through regular workout and mindful eating.

Technical Skills

- Languages:** Python, SQL (Structured Query Language)
- Databases:** MySQL
- Tools & Technologies:** Power BI, Microsoft Excel, ServiceNow, Jupyter Notebook
- Libraries & Frameworks:** Pandas, NumPy, Seaborn, Matplotlib
- Data Skills:** Data Cleaning, Exploratory Data Analysis (EDA), Data Visualization, Dashboarding Development, Reporting
- Soft Skills:** Client Communication, Problem Solving, Project Leadership, Research

Professional Experience

Consultant ServiceNow (Full-Time)

- Infocenter, Pune | Jun 2023 - Present
- Managed backend ServiceNow systems, delivering customized solutions by analyzing data to optimize workflows and client outcomes.
 - Maintained strong client relationships through data-driven communication and reporting.
 - Applied research and problem-solving skills to interpret system performance data, driving innovative improvements. Led an instance consolidation project using usage metrics to achieve cost savings, earning commendation.
 - Currently leading an independent project integrating data analysis and visualization to support decision-making, showcasing leadership and project management to exceed client expectations.
- Skills:** ServiceNow Platform Management, Data Analysis & Visualization, Client Relationship Management, Problem Solving & Research, Project Leadership & Management, Reporting & Communication

Projects

Banking Risk Analytics - Financial Services

[Project Link](#) [Presentation Link](#)

- [Python / Power BI / SQL / EXCEL] Jan 2025 - Feb 2025
- Analyzed dataset of 3,000 banking customers to assess loan default risk using Python (pandas, seaborn, matplotlib) for exploratory data analysis.
 - Cleaned and transformed data, categorizing estimated income, and loaded into MySQL for efficient querying.
 - Discovered key insights, such as correlations between deposits and savings indicating low-risk profiles, and links between age/income and savings.
 - Developed an interactive Power BI dashboard with multiple pages, visualizing loans and deposits via charts and slicers. Enhanced dashboard design with Canva to support stakeholder decisions on loan approvals and risk mitigation.

Marketing Analytics for Online Retail - E-commerce

[Project Link](#) [Presentation Link](#)

- [Python / SQL / Power BI / Excel / Data cleaning] Nov 2024 - Dec 2024
- Designed analytics solution for Shop Easy, improving conversion rates and engagement with SQL, Python, and Power BI.
 - Processed data in SQL, removing duplicates and enabling 18.5% January conversion analysis.
 - Conducted Python sentiment analysis on 400+ reviews (275 positive), driving 3.7 to 4.0 rating strategies.
 - Delivered Power BI dashboard with actionable insights, proposing promotions for 4.3% May low.

Healthcare Appointment Analysis - Healthcare Analytics

[Project Link](#)

- [Python (Pandas, Seaborn, Matplotlib, NumPy) / Data Cleaning / Data Visualization] Oct 2024 - Dec 2024
- Analyzed 110K+ Brazilian medical appointments to uncover key factors affecting patient no-shows.
 - Cleaned and transformed data (datetime parsing, age binning, weekday extraction) and created dummy variables for modelling.
 - Used Seaborn and Matplotlib for EDA; visualized trends across gender, age, SMS reminders, and chronic conditions.
 - Identified that SMS reminders, weekend bookings, and young age were strongly linked to no-show behavior.

Education

Finolex Academy of Management and Technology
Bachelor of Engineering - Information Technology

Maharashtra, India
Jul 2018 - May 2022

Awards and Certificates

- Data Analytics Professional Certificate - **Codebasics**.
- "**Pat On the Back Award**" for Adaptability, Proficiency, and Professionalism - **Infocenter**
- 5 -Star** SQL Certification – **HackerRank**
