

AAKIB ANSARI

FULL STACK DEVELOPER (PYTHON/DJANGO | MERN) | CYBERSECURITY-AWARE

Pune, Maharashtra | aakibansari217@gmail.com | 7888213718

SUMMARY

Motivated Python Developer with hands-on experience in building and deploying web applications using Django and Python automation tools. Also skilled in MERN stack development with a good understanding of full-stack workflows. Strong foundational knowledge in cybersecurity and networking, including hands-on practice with tools like Burp Suite, Metasploit, Nmap, and Wireshark. Adept at building secure, scalable applications, collaborating with Git, and continuously learning across development and security domains.

TECHNICAL SKILLS

Cybersecurity Tools: Kali Linux, Burp Suite, Metasploit, Nmap, Wireshark, Nikto, John the Ripper, Hydra

Networking: OSI Model, TCP/IP, DNS, DHCP, Subnetting, Routing, VPNs, NAT, Firewalls

Software Development: React.js, JavaScript, Node.js, Typescript, Java, Python, Django, Django REST Framework, Php, Git, Postman

Database: Mysql, MongoDB

Web Scraping & Automation: Selenium, BeautifulSoup, Requests, Automation Scripting

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern (Python/Django | MERN Exposure)

Jan 2025 - Jun 2025

- **Rental Car Expense Tracking System:** Built a role-based access (RBAC) platform for master and sub-admins to manage drivers, cab assignments, and operational expenses. Integrated custom modules for fuel logs, repair tracking, and automated financial reports for strategic analysis.
- **Dairy Delivery Platform:** Developed a real-time order and inventory management system with a mobile-friendly customer interface and dynamic admin dashboard to streamline logistics and delivery assignments.
- **E-commerce Website:** Engineered a modern shopping experience with product filtering, detailed item views, secure checkout (payment gateway), and admin tools for managing inventory, orders, and analytics.
- Emphasized secure coding, modular architecture, and data optimization across all projects for seamless user experiences.

EDUCATION

Bachelor of Vocation Software Development

Aug 2022 - May 2025

- Poona College of Arts, Science and Commerce, Pune

PROJECTS OR ADDITIONAL EXPERIENCE

- **Library Management System (Django | Python | SQLite)**
- Developed a Django web app with two roles: Admin and Student. Used JWT for secure admin authentication and book management (CRUD).
- Students can view books without login. Handled data with Django ORM and admin panel.
- **Bookstore Application**
- Built a full-featured bookstore application using the MERN stack, incorporating user authentication and authorization.
- Developed an intuitive admin dashboard to efficiently manage books, orders, and user accounts.
- Implemented secure login and registration processes for both customers and admins, ensuring a seamless user experience.
- Styled the application with Tailwind CSS, delivering a responsive and modern user interface.

ADDITIONAL INFORMATION

- **Certifications:** Full Stack Developer - WTL Tourism PVT LTD
- Python-focused developer with a growing interest in cybersecurity, practicing CTFs on Hack The Box and TryHackMe, and exploring CEH/OSCP concepts..
