	52.77		
	St Francis High School	March 2017	
	73.20		SSC
Projects	Business Analyst Experience in Projects		
	During my academic and COEPD training projects, I gathered and analyzed requirements through mock interviews and surveys, and documented them in BRD and FRD formats. I created user stories with acceptance criteria, use-case diagrams, and As-Is/To-Be process flows using tools like MS Visio. I also developed low-fidelity wireframes using Balsamiq to visualize UI elements. My work involved managing tasks on JIRA, participating in Agile ceremonies, and supporting UAT by preparing test scenarios and maintaining requirement traceability.		
	Dreamy Days Event Co.		
	Java, PHP and MYSQL- An event planning and management app built with Java, PHP, and MySQL. Enables clients to customize events, place orders, and choose vendors. Admins manage bookings, billing, and secure ticketing with multi-payment support.
