SUMMARY

A highly ambitious individual with foundational skills in documentation and Microsoft Power BI, and a strong emphasis on communication. Demonstrated ability in requirements gathering through academic projects, illustrating the capacity to turn data into actionable insights. Proficient in business analysis, data visualization, documentation, support data driven decision-making, and improve business processes. Strong ability to blend technical data analysis skills with a comprehensive understanding of business strategies and IT management. Seeking a Business Analyst position to drive data-informed decision-making and contribute value through effective documentation and communication strategies.

PROJECTS

Credit Card Financial Dashboard

- Developed an interactive dashboard using transaction and customer data from SQL database to provide real-time insights.
- Analysed financial trends and customer behaviour to support strategic decision-making across finance and risk departments.
- Improved stakeholder decision-making by providing actionable insights on financial health, risk management, and customer behaviour.
- Ensured user experience by optimizing dashboard performance, ensuring fast load times even with large datasets.
- Refined data visualization methodologies to deliver intuitive analytics, enabling timely identification of financial risks and opportunities for the credit card business.

Superstore Sales Dashboard

- Built a Power BI dashboard to analyze product categories, regional trends, customer segments using sales data.
- Defined and tracked key sales KPIs to identify trends, seasonal variations and operational bottlenecks.
- Designed interactive reports with filters and slicers for region, product category, and time taken enabling detailed analysis.
- Delivered actionable insights that informed inventory management, sales strategies, and business optimization efforts.
- Engineered advanced data visualizations within the Superstore Sales Dashboard, empowering stakeholders to uncover performance drivers.
- Integrated automated data refresh schedules and permission-based access controls into the Superstore Sales Dashboard, facilitating secure, up-to- date insights for decision-makers across multiple business units.

Inventory Management Mobile Solution

- Developed a mobile-based inventory management system to streamline stock tracking and real-time updates.
- Enabled efficient product scanning, stock level monitoring, and order management through mobile devices.
- Integrated barcode scanning and QR code technology for accurate, real-time inventory tracking and reduced manual errors.
- Enhanced user experience with a simple, intuitive mobile interface, ensuring ease of use across all skill levels.
- Optimized backend synchronization to ensure seamless data consistency across distributed mobile devices and central databases, facilitating reliable inventory oversight in dynamic operational environments.

EDUCATION

MBA (Information Technology and Systems Management)

NMIMS • 2024 • 8.9

BCA

Modern College of Arts, Science and Commerce • 2022 • 9.0

CERTIFICATIONS
