- Managing the team scheduling weekly meetings to enhance team communication resulting the project efficiency.
- Developed and delivered presentations to clients, improving understanding of project goals.
- Collaborated with cross-functional teams to streamline project workflows.

Lentra.AI, Pune

July 2023 - Current

- Deployed and configured MongoDB databases in Linux environments, ensuring optimal performance and reliability.
- Proficient in SQL query writing and scripting, with extensive experience in developing, optimizing, and maintaining complex SQL queries to support data analysis, reporting, and database management tasks.
- Designed and implemented MongoDB replication architectures to support high- availability and fault-tolerance requirements.
- Configured and monitored replication sets to ensure data consistency and synchronization across replica nodes.
- Implemented and maintained replica set elections, automatic failover, and

priority configurations to ensure uninterrupted database operations.

- Conducted regular health checks and performance tuning to optimize replication performance and minimize latency.
- Planned and executed failover and recovery procedures during planned maintenance and unplanned outages.
- Collaborated with cross-functional teams to troubleshoot replication issues and optimize system performance.
- Documented replication topologies, procedures, and best practices for knowledge sharing and team training.
- Designed and implemented database schemas, indexes, and sharding strategies to support high-throughput applications.
- Optimized query performance through indexing and aggregation pipeline optimization, resulting in significant performance gains.
- Implemented backup and restoration procedures to ensure data availability and disaster recovery readiness.
- Collaborated with cross-functional teams to troubleshoot database issues and optimize system performance.
- Scheduled daily/weekly backup scripts.
- Getting communicated with the back side clients related to projects, bank data, loan applications, etc. (Bank name: HDFC, Chola mandalam Finance, Indusind Bank, HDB Financial Services)
